Thank you for purchasing an Agilent G5419A, G5429A, or G5430A Direct Drive Robot. To get you started and to assure a successful and timely installation of your Agilent software, please refer to this specification or set of requirements.

Correct site preparation is the key first step in ensuring that your instruments and software systems operate reliably over an extended lifetime. This document is an information guide and checklist prepared for you that outlines the supplies, consumables, space and utility requirements for your equipment.

Customer Responsibilities

Make sure your site meets the following prior specifications before the installation date. For details, see specific sections within this checklist, including:

- The necessary laboratory or bench space is available, and meets the specified requirements.
- The environmental conditions for the lab, as well as laboratory gases and plumbing.
- The power requirements related to the product (e.g., number & location of electrical outlets).
- The required operating supplies necessary for the product and installation.
- Please consult Other Requirements section below for other product-specific information.
- For more details, please consult the Agilent Direct Drive Robot Site Preparation and Safety Guide (part number G5430-90001).

If Agilent is delivering installation and familiarization services, users of the instrument should be present throughout these services; otherwise, they will miss important operational, maintenance and safety information.

Important Customer Information

1. If you have questions or problems in providing anything described as a Customer Responsibility above, please contact your local Agilent or partner support/service organization for assistance prior to delivery. In addition, Agilent and/or its partners reserve the right to reschedule the installation dependent upon the readiness of your laboratory.

2. Should your site not be ready for whatever reasons, please contact Agilent as soon as possible to re-arrange any services that have been purchased.

3. Other optional services such as additional training, operational qualification (OQ) and consultation for user-specific applications may also be provided at the time of installation when ordered with the system, but should be contracted separately.
Dimensions and Weight

Identify the laboratory bench space before your system arrives based on the table below.

Pay special attention to the **total height and total weight requirements for all system components you have ordered and avoid bench space with overhanging shelves.** Also pay special attention to the total weight of the modules you have ordered to ensure your laboratory bench can support this weight.

**Special Notes.**

<table>

<td>Direct Drive Robot (DDR)</td>
<td>31.1 kg</td>
<td>85.1 cm</td>
<td>33.5 in</td>
<td>51 cm</td>
</tr>
</tbody>
</table>

Environmental Conditions

Operating your instrument within the recommended temperature ranges insures optimum instrument performance and lifetime.

**Special Notes**

1. Performance can be affected by sources of heat & cold e.g. direct sunlight, heating/cooling from air conditioning outlets, drafts and/or vibrations.
2. The site’s ambient temperature conditions must be stable for optimum performance.

<table>
<thead>
<tr>
<th>3. Instrument Description</th>

Power Consumption

**Special Notes**

1. If a computer system is supplied with your instrument, be sure to account for those electrical outlets.
Direct Drive Robot (DDR) | 100–240 & 50/60 | 10 Amps | 200 W typical | Mains. 2 x 10A, 250 V, time delay  
Logic power/switch 2A, 250 V, time delay  
Robot. 4A, 250 V, time delay  
Emergency stop pendant. 0.8A, 250 V, time delay
