Thank you for purchasing an Agilent G5581A Microplate Labeler. To get you started and to assure a successful and timely installation, please refer to this specification or set of requirements.

Correct site preparation is the key first step in ensuring that your instruments and software systems operate reliably over an extended lifetime. This document is an information guide AND checklist prepared for you that outlines the supplies, consumables, space and utility requirements for your equipment for your site.

Customer Responsibilities

Make sure your site meets the following prior specifications before the installation date.

For details, see specific sections within this checklist, including:
- The necessary laboratory or bench space is available
- The environmental conditions for the lab as well as laboratory gases and plumbing
- The power requirements related to the product (e.g., number & location of electrical outlets)
- The required operating supplies necessary for the product and installation
- Please consult Other Requirements section below for other product-specific information.
- For more details, please consult the Microplate Labeler User Guide.

If Agilent is delivering installation and familiarization services, users of the instrument should be present throughout these services; otherwise, they will miss important operational, maintenance and safety information.

Important Customer Information

1. If you have questions or problems in providing anything described as a Customer Responsibilities above, please contact your local Agilent or partner support/service organization for assistance prior to delivery. In addition, Agilent and/or its partners reserve the right to reschedule the installation dependent upon the readiness of your laboratory.
2. Should your site not be ready for whatever reasons, please contact Agilent as soon as possible to re-arrange any services that have been purchased.
3. Other optional services such as additional training, operational qualification (OQ) and consultation for user-specific applications may also be provided at the time of installation when ordered with the system, but should be contracted separately.
Dimensions and Weight

Identify the laboratory bench space before your system arrives based on the table below.

Pay special attention to the total height and total weight requirements for all system components you have ordered and avoid bench space with overhanging shelves. Also pay special attention to the total weight of the modules you have ordered to ensure your laboratory bench can support this weight.

Environmental Conditions

Operating your instrument within the recommended temperature ranges ensures optimum instrument performance and lifetime.

Special Notes

1. Performance can be affected by sources of heat & cold, e.g., direct sunlight, heating/cooling from air conditioning outlets, drafts and/or vibrations.
2. The Microplate Labeler is for indoor use only.

Other Requirements

Compressed air requirements
The Microplate Labeler requires the use of clean, dry, compressed air to move pneumatic components inside the device. The compressed air can be from a centralized source (house), compressed-air cylinder, or portable compressor.
- Flow rate: 1.2 Lps (2.5 cfm)
- Pressure: 0.55 MPa (80 psi)

**CAUTION:** Ensure that the air coming into the Microplate Labeler is properly filtered from moisture or aerosolized impurities. Significant moisture or impurities in the air line can adversely affect the performance and life of the Microplate Labeler. Using oil compressors can cause oil to leak into the Microplate Labeler and void your warranty.

Computer Requirements
The computer available from Agilent Technologies (G5880 64009) has the following specifications:

- HP Mobile Workstation: Intel® Core™ i7-4600M (2.9 GHz, 4 MB cache, 2 cores), 15.6" display (1920x1080), 8GB RAM, Intel Dual Band Wireless-AC 7260 802.11ac, USB Ethernet Adapter USB300M
- Windows 10 (64-bit) pre-installed
- VWorks Automation Control Software or Microplate Labeler ActiveX Control
