The rack adapter shown in Fig. 1 is a 19" modular chassis system based on DIN 41494 part 5 manufactured by “Eurocard”.

![Fig. 1 - Rack adapter 3 units](image)

The modular chassis accepts standard 3U control units and provides mechanical mounting in cases or racks corresponding to the dimensional requirements of 19" front panels (DIN 41494 part 1).

The basic structure of this modular chassis system provides a further advantage. The aluminum side panels are connected cross extrusions by four screws to give low-weight strength and stability. This system reduces mounting times and cuts mechanical systems down to a minimum.

Low chassis height provides easy mounting on chassis runners. Telescopic slides may be fixed to standard mounting holes on the side panels. Assemble the modular chassis as of Fig. 2 with the cross extrusion (3) so far enough to support the control units to be installed.

Fig. 3 - Outline dimensions

where

- **U** (mounting height) is multiple of the height unit 1U = 44.45 mm = 1¾"
- HP (mounting width) is a multiple of the horizontal pitch (HP)
- maximum of 84 HP
- 1 HP = 5.08 mm
- Total width of the modular chassis = 482.6 mm = 19".

### DISPOSAL

**Meaning of the "WEEE" logo found in labels**

The following symbol is applied in accordance with the EC WEEE (Waste Electrical and Electronic Equipment) Directive.

This symbol (valid only in countries of the European Community) indicates that the product it applies to must NOT be disposed of together with ordinary domestic or industrial waste but must be sent to a differentiated waste collection system.

The end user is therefore invited to contact the supplier of the device, whether the Parent Company or a retailer, to initiate the collection and disposal process after checking the contractual terms and conditions of sale.
