Thermo GC drivers

Release Notes
What’s New

Thermo GC 8000 (v 1.5.1.182)

- When performing an acquisition, the system stayed in running step until the GC had completed its program and went back to initial the settings of the method. This has been corrected.

- When printing a chromatogram report containing the control part of the method, an error message was printed. In the new version no error message is printed.
Known problems

**Thermo GC 8000**
None.

**Thermo AS 800/850**
None.
