Agilent PC Bundle for Chemstation Edition

PC Bundle Set-up with Microsoft Windows 10

First time boot-up of the Agilent bundle PC

1. When you start this PC the first time, an internal script is activated. The user is prompted to select the country/region, preferred language, keyboard layout and the time zone, user name and password. The language must be set to be one of the Agilent supported Operating System languages English (United States), Chinese or Japanese.

2. As soon as the Microsoft Windows 10 related configuration is done, and the desktop is visible **restart the Bundle PC to complete the Windows setup before doing the next steps!** (This may take several minutes)

3. The **PC name** will now be DESKTOP-XXXXXXXX (where “XXXXXXXX” is a randomly generated sequence of letters and numbers). If a different PC name is required change it now. If a PC name change is required after ChemStation got installed, please check the installation manual for further instructions.

4. Connect the PC to a given domain if desired.

5. **Ensure all Windows Updates have completed before installing ChemStation.**

6. Click the **OpenLabCDSCS** icon on the desktop to run the install script. *Don’t close the black CMD window during the installation process.* After the installation the Software Verification Report will show up. This indicates that the installation is done.

   **NOTE** In case the CMD window is still open it can be closed now.

7. Open the OpenLab Control Panel and install your license. The OpenLab CDS ChemStation Edition is now ready to use.
Help and Support

Using Online Help
Online Help can be accessed using via **F1** within any open user interface interacting with Agilent OpenLab Software.

Getting Support
Please contact your local Agilent Technologies Customer Care Center to obtain support. For details please visit the following web page: [http://www.agilent.com/chem/contactus](http://www.agilent.com/chem/contactus).

In any communication with the Software support team regarding a problem with this OpenLab CDS bundle, please clearly state the following:

- Your name, address, e-mail address and telephone number.
- Your OpenLab CDS product name and version number. Both are listed in Help and About.
- A description of the problem, and what you were trying to do when the problem occurred.
Re-Image and Installation Preparation Procedure

This section refers to the Emergency Recovery Media provided with the **HP Z2-G4 Workstation Bundle PC for OpenLab CDS ChemStation** from Agilent.

The system will be set to the following configuration:

- **Edition:** Windows 10 Pro
- **Version:** 1803
- **OS Build:** 17134.1
- **System type:** 64-bit operating system

**CAUTION** Irreversible loss of data will occur when re-imaging the computer!

**STEPS FOR RE-IMAGING THE PC**

1. Plug the Recovery USB Flash Drive in the USB port before power-on.
2. Press the power button. Immediately press the Escape key repeatedly, about once every second, until the Startup Menu opens.
3. Choose **Boot Menu (F9)**

   ![Boot Menu Screenshot]

   **NOTE:** The actual name may defer from the example in this figure

4. Choose the USB media, e.g. **UEFI - SMI Corporation USB DISK...**

   ![USB Media Selection Screenshot]
5 The Windows 10 logo will be displayed, followed by a command line window. Enter the command **ApplyImage** there and press ENTER.

6 As a next step choose
   a  option 2 if the complete C: drive should be re-imaged as one partition, or
   b  option 1 if a C: and D: partition shall be set up.

   In doubt choose option 2 (which means no D: partition) because if the user is not aware of the D: drive this could lead to this disk space remaining unused.

7 After completing 100% of re-image procedure (see percentage counting) type **exit** to reboot.

8 Complete the Windows Setup

   **NOTE** Windows 10 Pro must be activated as follows:
   Once connected to the Internet, the activation may be triggered by Microsoft automatically after some time. Instead waiting for this event, you can actively press **[Windows Key] + R** to open a Run window. Type **slui 4**, and press **<enter>**.
   Then choose your country and activate Windows by following the instructions provided.

9 Restart the Bundle PC to complete the setup script before doing the next steps!!
   (This may take several minutes)

10 Double-click the Adobe icon on the desktop, accept the license agreement and confirm Adobe Reader as the default PDF application (follow the instructions given > **Apply**)

   The PC will now have a unique Device name (**DESKTOP-xxxxxxx**).
   Decide if this name should remain or if there are other requirements e.g. from the local IT.

   Now proceed with the ChemStation Installation following the instructions provided in the installation manual.
