This technical note describes the installation of the Bio-inert Solvent Heating Devices.

For bio-inert modules use bio-inert parts only!

In this note the installation of the Bio-Inert Solvent Heating Devices (9 µL internal volume, 600 bar max pressure) (G5616-81000) into the Agilent 1290 Infinity TCC (G1316C) is described. The additional solvent heating devices can be arranged in the G1316C in various locations depending on the application needs. Some examples are shown in Figure 1 on page 2.
The solvent heating devices are mounted directly onto the TCC’s heat exchangers.

**NOTE** Don’t forget to remove the protection foil from the heating transfer pad at the rear of the solvent heating device before installation.

**NOTE** If the solvent heating devices are installed in the central position on the TCC’s heat exchangers as shown in Figure 1 on page 2, the column identification system cannot be used.

**CAUTION**

Strong force/torque will damage PK/ST capillaries

Be careful when installing PK/ST capillaries.

→ Follow the instructions given in the technical note Agilent UHP-FF fittings Installation Note (G5611-90123).
