Technology Licenses

The hardware and/or software described in this document are furnished under a license and may be used or copied only in accordance with the terms of such license.

Restricted Rights Legend

U.S. Government Restricted Rights. Software and technical data rights granted to the federal government include only those rights customarily provided to end user customers. Agilent provides this customary commercial license in Software and technical data pursuant to FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for the Department of Defense, DFARS 252.227-7015 (Technical Data -Commercial Items) and DFARS 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation).

Safety Notices

CAUTION

A CAUTION notice denotes a hazard. It calls attention to an operating procedure, practice, or the like that, if not correctly performed or adhered to, could result in damage to the product or loss of important data. Do not proceed beyond a CAUTION notice until the indicated conditions are fully understood and met.

WARNING

A WARNING notice denotes a hazard. It calls attention to an operating procedure, practice, or the like that, if not correctly performed or adhered to, could result in personal injury or death. Do not proceed beyond a WARNING notice until the indicated conditions are fully understood and met.
The Agilent A-Line Electronic Crimping Tools can be used to crimp and decap standard crimp caps on laboratory sample vials. Jaw sets are available to accommodate the most popular sizes.

Please read through this entire guide to familiarize yourself with the operation of the tool before proceeding. Use the same degree of care as you would with any precision instrument.

This operation guide applies to the following products:

Safety and Regulatory Certifications

The A-Line Electronic Crimping Tools are designed and manufactured under a quality system registered to ISO 9001.

Symbols

Warnings in the manual or on the instrument must be observed during all phases of operation, service, and repair of this instrument. Failure to comply with these precautions violates safety standards of design and the intended use of the instrument. Agilent Technologies assumes no liability for the customer’s failure to comply with these requirements.

See accompanying instructions for more information.

Wear safety glasses when crimping or decapping.

The crimper or decapper jaws can pinch severely.

Never insert fingers into the crimping tool jaws.

Do not discard this electrical/electronic product in domestic household waste.

Korean regulatory approval.

California Energy Commission for devices with a Battery Charger.

Environment-friendly use period. (EFUP)

Regulatory compliance mark for Australia and New Zealand.
Sound emission declaration

Sound pressure

Sound pressure LpA < 70.1 dB according to EN 27779:1991.

Class A EMC declaration

This equipment has been evaluated for its suitability for use in a commercial environment. When used in a domestic environment, there is a risk of radio interference.

</table>

Intended use

The A-Line Electronic Crimping Tools is intended for use in a laboratory environment. All other uses are prohibited.

Limits

**Temperature**: 15°C to 35°C

**Maximum humidity**: 75%

**Pressure**: 0.75 to 1 bar
Warnings, Intended Use, and Limits

Important safety information
Keep the following important safety notices in mind when using the A-Line Electronic Crimping Tools.

**WARNING** Follow all instructions or injury may result.

**WARNING** Wear safety glasses when crimping or decapping.

**WARNING** Never insert fingers into the crimper or decapper. The crimper or decapper jaws can pinch severely.

Special battery warnings

**WARNING** Risk of burns; battery may explode or catch fire if mishandled.

**WARNING** Use only the manufacturer-supplied 7.5 volt DC power supply and charge the battery only in the crimping tool.

**WARNING** Do not heat above 60 °C.

**WARNING** Do not crush or modify.

**WARNING** Use only the replacement battery pack part number 5190-3192. Use of other batteries may cause fire during charging or use.

**WARNING** Do not disassemble or dispose of in fire.
Set Up

Remove the tool, power supply, cable, and USB drive from the shipping container. Inspect the crimping tool and any jaw sets. If there is any visible damage, contact your supplier immediately.

Step 1. Charge the battery
A red battery indicator appears when recharging is necessary.

Use these steps to charge the battery:

1. Connect the supplied power cord to an electrical outlet and to the side of the crimping tool.

A green plus symbol will be displayed inside the battery charging icon, and the green battery fill indicator will scroll across the icon.

2. Charging is complete when the green battery fill scrolling stops and the icon is solid green. Disconnect the power cord from the crimper.
Step 2. Select a display language

1. Press and hold the **GO** button for three seconds to enter the Settings mode.

   Alternatively, press the **Settings** button on the side of the crimper with a pen or small tool.

2. Press ▼ and ▲ to scroll to **Language**.

3. Press the **GO** button.

4. Press ▼ and ▲ to scroll to your preferred language.

5. Press the **GO** button to select your language.

6. Press the **GO** button again to confirm your language selection and exit the Settings mode.
Crimping

Once you have set up your crimper (Set Up on page 7), you can follow these steps to crimp continuously as long as the battery remains charged and Reset All (Reset on page 18) is not applied.

Use standard aluminum, steel caps or two-part caps with aluminum sides and magnetic tops, together with seals of standard size and thickness.

Crimping operation

To crimp a cap on a vial:

1. Place a seal and a cap on a vial.
2. Rest the crimper on top of the cap.
3. Press and hold the GO button lightly until the crimp is complete.

If the cap is too tight or too loose, see Adjust crimping tightness on page 9.

Adjust crimping tightness

The numerical setting of the crimping tool sets a stop position that determines the amount of cap compression. This setting is precise and consistent. There may be some drifting in the setting over time due to stretching or wearing-in of tool components, but
generally, the reproducibility of the crimp is as good as the consistency of the vials and seals. Some adjustment for different lots of caps and seals is to be expected.

Use the same type and size of vials, caps, and seals for the purpose of setting the crimp tightness as you will for production crimping.

To adjust crimp tightness:
1. Place a seal and a cap on a vial.
2. Rest the crimper on top of the cap.
3. Press and hold the GO button lightly until the crimp is complete.
4. Examine the crimp for adequate sealing.

5. Use the ▼ and ▲ buttons to adjust the tightness of the crimp.

   If the cap spins easily, press the ▲ button two or three times.

   If it is too tight, press the ▼ button.

6. Try the new setting with a new vial, seal and cap.
Decapping

Once you have set up your decapper to decap (Set Up on page 7), you can follow these steps to decap continuously as long as the battery remains charged and Reset All (Reset on page 18) is not applied.

Decapping operation

To decap:

1. Rest the jaws on top of the cap to be removed.
2. Press and hold the GO button lightly until the cap is removed.

If the decap failed, use the ▼ and ▲ buttons to adjust the decap motion, and retry the procedure.
Statistics and Log

Use the statistics and log displays to see information about the history of your tool.

Statistics

To see the count of charges and cycles:

1. Press and hold the GO button for three seconds to enter the Settings mode.

   Alternatively, press the Settings button on the side of the crimper with a pen or small tool.

2. Press ▼ to scroll to Statistics.

3. Press the GO button. The count of cycles since last charge is shown.

4. Press ▼ to scroll to total cycles.

5. Press ▼ to scroll to total charges.

6. Press the GO button to exit.
Log
The Log displays the tightness setting, whether the crimp set point was reached, and if there was an error for each of the last 25 completed cycles.

1. Press and hold the **GO** button for three seconds to enter the Settings mode.

   Alternatively, press the **Settings** button on the side of the crimper with a pen or small tool.

2. Press ▼ and ▲ to scroll to **Log**.

3. Press the **GO** button to view the log.

4. Press ▼ and ▲ to scroll through the log for each of the last 25 cycles.

5. Press the **GO** button again to exit.
## Troubleshooting, Maintenance, and Repair

Battery replacement

**WARNING**
Use only the replacement battery pack part number 5190-3192. Use of other batteries may cause fire during charging or use.

To replace the battery:

1. Remove the screw holding the battery cover in place.

2. Remove the battery cover.

3. Without disconnecting the wire, gently pull the battery out of the case.

   Do not throw the battery away. Recycle it in accordance with local regulations.

4. Press the connector latch and gently pull the connector apart.

5. Securely connect the new battery.
6 Push the battery into the case, bending the wires if necessary.

7 Replace the cover.

8 Replace the retaining screw.

9 Use the steps in Reset on page 18 to reset the battery charge count.

Reset
To reset the tool:
1 Press and hold the GO button for three seconds to enter the Settings mode.

Alternatively, press the Settings button on the side of the crimper with a pen or small tool.

2 Use the ▼ and ▲ buttons to scroll through the menu to Reset.

3 Press the GO button.
4 Use the ▼ and ▲ buttons to scroll to either **Reset Home**, **Reset All** or **Battery**.

- **Reset Home** - Sends the crimper back to its home position. No settings, logs, or statistics are changed.
- **Reset All** - Sends the crimper back to its home position and returns the tightness setting to the original factory default of 50%. No logs or statistics are changed.
- **Battery** - Resets the charge count. It is important to reset the charge count when a new battery is installed.

5 Press the **GO** button to make the selection.

6 Press the **GO** button to confirm.

7 Use the ▼ and ▲ buttons to scroll to **Exit**.

8 Press the **GO** button.

9 Use the ▼ and ▲ buttons to scroll to **Exit**.

10 Press the **GO** button to confirm exit.
Maintenance

Serviceable parts
The electronic crimping tool does not contain user serviceable parts.

Cleaning
Do not immerse the crimping tool in water or solvent. To clean the unit, disconnect the power and wipe down with a damp, lint-free cloth. Do not get the electronics wet.

Avoid permitting metal parts of the crimping tool to come into contact with corrosive material during use. If they do, try to wipe them clean with a suitable mild neutralizing solution.

Repair
If the crimping tool is still in the warranty period, contact your Agilent office or dealer. If the warranty period has expired, please visit www.agilent.com/chem/crimper-repair for information about the crimper repair service.

Recycling
For recycling, contact your local Agilent sales office.
