Conformance

Results obtained from inspection and testing procedures during manufacture are verified to ensure that the product meets current specifications.

The reagents have been manufactured and tested under the control of an internationally certified quality assurance system meeting the requirements of ISO9001:2008, or higher certification standards. The manufacture, inspection, and testing have been performed by trained personnel. The instrumentation and materials used in the qualification process are identified and traceable. All associated test instruments are maintained and calibrated.
