| Quality Controlled By | Matt Huffman |
| Shipping Conditions | Shipped on dry ice. |
| Storage Conditions | Store at -80°C upon receipt. |

## Description

The SureSelect Target Enrichment System is a DNA capture technology developed to isolate genomic sequences of interest for downstream analysis by next-generation sequencing (NGS).

## Test Conditions

Library RNA integrity and concentration is verified using the Agilent 2100 Bioanalyzer. The RNA library is functionally tested for complexity and performance in a SureSelect DNA capture experiment using QPCR.

**Limited Product Warranty**

This warranty limits our liability to replacement of this product. No other warranties of any kind, express or implied, including, without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by Agilent. Agilent shall have no liability for any direct, indirect, consequential, or incidental damages arising out of the use, the results of use, or the inability to use this product.

**For Research Use Only. Not for use in diagnostic procedures. This certificate is a declaration of analysis at the time of manufacture.**

**Made in USA**
