| <b>Shipping Conditions</b>   | Shipped on dry ice.               |
| <b>Storage Conditions</b>    | Store at -80°C upon receipt.      |

### Description

The SureSelect Target Enrichment System is a hybridization-based system developed to isolate genomic or transcriptomic sequences of interest for downstream analysis by next-generation sequencing (NGS). This component is the RNA probe capture library designed to work with the appropriate SureSelect Reagent Kit to enable selective capture of the regions of interest.

### Test Conditions

The RNA probe library integrity is verified on the Agilent 2100 Bioanalyzer. The RNA probe library is functionally tested in a SureSelect DNA capture experiment with performance verified by QPCR.

### Limited Product Warranty

This warranty limits our liability to replacement of this product. No other warranties of any kind, express or implied, including, without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by Agilent. Agilent shall have no liability for any direct, indirect, consequential, or incidental damages arising out of the use, the results of use, or the inability to use this product.

**For Research Use Only. Not for use in diagnostic procedures. This certificate is a declaration of analysis at the time of manufacture.**

### Made in China

Agilent Biosciences (Hangzhou) Co., Ltd  
Building 4, No.208 Zhenzhong Road  
Xihu District, Hangzhou City, Zhejiang Province
