### Description

This ClearSeq probe library is used with the SureSelect XT or SureSelect QXT Target Enrichment System to isolate genomic sequences of interest for downstream analysis by next-generation sequencing (NGS). The final size of the probe library is 0.79 Mb plus the size of the custom content in the design.

### Test Conditions

The RNA probe library integrity is verified using an Agilent TapeStation system or Agilent 2100 Bioanalyzer system. The ClearSeq Comprehensive Cancer base RNA library is functionally tested in a SureSelect DNA capture experiment with performance verified by sequencing. Synthesis and capture quality of additional Plus content are validated by QPCR.
