

600750 0006662094

Lot 0006662094

Page 1 of 1

Catalog Number	600750
Product Name	Human U6 snRNA Forward Primer
Expiration Date	2023-01-30
Quantity	200 µl (200 PCR Reactions)
Certified By	Dana Faver
Quality Controlled By	Matt Huffman
Shipping Conditions	Shipped on dry ice.
Storage Conditions	Store at -20°C upon receipt.

Concentration

3.125 µM

Description

The U6 snRNA Forward Primer was designed for PCR amplification of the human U6 small nuclear RNA (snRNA) when used with the High-Specificity miRNA QRT-PCR Detection Kit. This kit provides a complete system for the detection of miRNAs from a sample of total RNA using real-time quantitative reverse transcription PCR (QRT-PCR). Amplification of the U6 target is useful as an endogenous control reaction to normalize variations in the amount of cDNA template across samples.

Storage Buffer

5 mM Tris-HCl, pH 8.0
0.1 mM EDTA

Limited Product Warranty

This warranty limits our liability to replacement of this product. No other warranties of any kind, express or implied, including, without limitation, implied warranties of merchantability or fitness for a particular purpose, are provided by Agilent. Agilent shall have no liability for any direct, indirect, consequential, or incidental damages arising out of the use, the results of use, or the inability to use this product.

For Research Use Only. Not for use in diagnostic procedures. This certificate is a declaration of analysis at the time of manufacture.
