**Agilent Statement on REGULATION (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) with amendments**

Agilent manages a program to minimize potentially harmful materials in our products while ensuring high product quality and reliability. Agilent is aware of substance controls and obligations as a supplier of substances, mixtures, and articles required by Regulation EC No 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) as amended.

The Candidate List of substances of very high concern (SVHC), according to Article 59, is maintained by the European Chemical Agency (ECHA). ECHA regularly revises the candidate list, available at <https://echa.europa.eu/candidate-list-table>. Agilent monitors the candidate list on an ongoing basis for updates on SVHC that are relevant to our product portfolio.

Agilent strives to avoid SVHCs in our products, for the benefit of our customers and the environment. Agilent maintains an internal supply chain management process, placing restrictions on the materials present in purchased parts, components, materials, and products. Our suppliers are held responsible for fulfilling their obligations under the REACH regulation. Agilent's General Specification of the Environment (GSE), available at <https://www.agilent.com/environment/GSE.pdf>, requires suppliers to meet these requirements and to inform Agilent of any parts containing chemicals listed in the REACH Regulation or on the Candidate List.

Agilent substances, mixtures and selected articles placed on the European Union single market, within scope of Article 31, are supported with a Safety Data Sheet (SDS) available at <https://www.agilent.com/>. Based on information available to Agilent, SVHCs above the threshold content of 0.1% weight by weight (w/w) that are within our products are listed in the respective SDSs. For further information, please contact [gse\\_inquiry@agilent.com](mailto:gse_inquiry@agilent.com).

Agilent is committed to ensuring that our operations, products, and services align with relevant environmental, health, and safety regulations. We deploy controls to meet additional internal standards and implement processes for continuous enhancement in environmental sustainability. This commitment involves recycling, reducing waste, conserving resources, preventing pollution, developing environmentally friendly products, managing hazardous materials, achieving net-zero greenhouse gas emissions, and fostering a culture of environmental responsibility.

For more information about Agilent's environmental programs and policies, please visit our website at <http://www.agilent.com/environment/environment.shtml>.
