Requirement for Suppliers, Third-Party Partners and Contractors
Non-Agilent Workers who perform work at our U.S. and Canada sites

COVID-19 Vaccination Requirement

Date: November 29, 2021

Agilent Technologies is a science-driven company whose products and services have been instrumental in the development and manufacture of vaccines. The health and safety of our employees, suppliers, third-party partners, contractors, customers, and the communities in which we work are our primary concern. Agilent believes that COVID-19 vaccines are currently the best defense at preventing severe COVID-19 infections and hospitalizations.

Agilent’s COVID-19 policy requires all on-site visitors including suppliers, third-party partners, contractors (including sub-contractors) and customers who visit Agilent’s U.S. and Canada facilities be fully vaccinated and follow masking and social distancing requirements. Fully vaccinated means it has been two weeks after completing a course of a COVID-19 vaccine approved by the US FDA or the Emergency Use Authorization by Health Canada, and/or by the World Health Organization (WHO) for employees vaccinated outside Canada. Proof of vaccination will be required before gaining access to an Agilent U.S. or Canada site.

Our goal is to take the necessary steps to provide a safe, secure, and productive work environment.

If you have questions, please send them to Agilent-supplier.communication@agilent.com.
