The Right Choice When Your Lab’s Reputation Is at Stake
Agilent cannabis and hemp testing solutions

Partner with Agilent for consistent start-to-finish testing in a rapidly changing industry

With cannabis and hemp testing, it’s easy to feel overwhelmed by evolving regulations, customer demands, and challenging matrices. Fortunately, you don’t have to overcome these obstacles alone.

Agilent has developed a total package of analytical methodologies—from sample preparation to reporting—for ensuring the potency and safety of cannabis and cannabinoid products.

What’s more, we guarantee your peace-of-mind. If we cannot fix an instrument covered by an Agilent service plan—regardless of manufacturer—we’ll replace it with an Agilent equivalent instrument, free.

Together, we can help your lab:

- Maintain data integrity and ensure accurate product labeling.
- Get a headstart with Agilent eMethods and consumable kits.
- Reduce downtime and achieve the throughput you need to keep up with sample volume.
- Develop, implement, and optimize methods with guidance from our team of cannabis application experts.

Agilent analytical workflows: Designed and tested for cannabis and cannabinoid products

Whether you are a startup or a high-throughput lab, Agilent is your single source for confident cannabis testing.

Chemical standards, SPE, vials, consumable kits
- eMethods* and application consulting
- Instruments
- Software
- CrossLab services
