SAFETY DATA SHEET
PathDetect p53 cis Reporting System, Part Number 219083

Section 1. Identification

Product identifier : PathDetect p53 cis Reporting System, Part Number 219083
Part no. (chemical kit) : 219083
Part no. : p53-Luc Plasmid 219085-51
pFC-p53 Positive Control Plasmid 219083-52
Material uses : Analytical reagent.
   p53-Luc Plasmid 0.05 ml
   pFC-p53 Positive Control Plasmid 0.2 ml (5 µg 25 ng/µl)
Supplier/Manufacturer : Agilent Technologies, Inc.
   5301 Stevens Creek Blvd
   Santa Clara, CA 95051, USA
   800-227-9770
Emergency telephone number (with hours of operation) : CHEMTREC®: 1-800-424-9300

Section 2. Hazard identification

Classification of the substance or mixture
Not classified.

GHS label elements
Signal word : p53-Luc Plasmid No signal word.
   pFC-p53 Positive Control Plasmid No signal word.
Hazard statements : p53-Luc Plasmid No known significant effects or critical hazards.
   pFC-p53 Positive Control Plasmid No known significant effects or critical hazards.
Precautionary statements
Prevention : p53-Luc Plasmid Not applicable.
   pFC-p53 Positive Control Plasmid Not applicable.
Response : p53-Luc Plasmid Not applicable.
   pFC-p53 Positive Control Plasmid Not applicable.
Storage : p53-Luc Plasmid Not applicable.
   pFC-p53 Positive Control Plasmid Not applicable.
Disposal : p53-Luc Plasmid Not applicable.
   pFC-p53 Positive Control Plasmid Not applicable.
Supplemental label elements : None known.
   p53-Luc Plasmid None known.
   pFC-p53 Positive Control Plasmid None known.
Other hazards which do not result in classification : None known.
   p53-Luc Plasmid None known.
   pFC-p53 Positive Control Plasmid None known.

Date of issue/Date of revision : 12/23/2019  Date of previous issue : 12/31/2017  Version : 4
Section 3. Composition/information on ingredients

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First-aid measures

### Description of necessary first aid measures

#### Eye contact
- **p53-Luc Plasmid**
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
- **pFC-p53 Positive Control Plasmid**
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

#### Inhalation
- **p53-Luc Plasmid**
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
- **pFC-p53 Positive Control Plasmid**
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

#### Skin contact
- **p53-Luc Plasmid**
  - Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
- **pFC-p53 Positive Control Plasmid**
  - Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

#### Ingestion
- **p53-Luc Plasmid**
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
- **pFC-p53 Positive Control Plasmid**
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

### Most important symptoms/effects, acute and delayed

#### Potential acute health effects

\[Version : 4\]
Section 4. First-aid measures

**Skin contact**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No known significant effects or critical hazards.

**Ingestion**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No known significant effects or critical hazards.

**Over-exposure signs/symptoms**

**Eye contact**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No specific data.

**Inhalation**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No specific data.

**Skin contact**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No specific data.

**Ingestion**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No specific data.

**Indication of immediate medical attention and special treatment needed, if necessary**

**Notes to physician**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

**Specific treatments**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No specific treatment.

**Protection of first-aiders**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

**Extinguishing media**

**Suitable extinguishing media**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - Use an extinguishing agent suitable for the surrounding fire.

**Unsuitable extinguishing media**
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - None known.

Specific hazards arising from the chemical
- **p53-Luc Plasmid**
- **pFC-p53 Positive Control Plasmid**
  - In a fire or if heated, a pressure increase will occur and the container may burst.

Methods and materials for containment and cleaning up

Date of issue/Date of revision : 12/23/2019  Date of previous issue : 12/31/2017  Version : 4
Section 6. Accidental release measures

Methods for cleaning up : p53-Luc Plasmid
Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

pFC-p53 Positive Control Plasmid
Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling

Protective measures : p53-Luc Plasmid
Put on appropriate personal protective equipment (see Section 8).

pFC-p53 Positive Control Plasmid
Put on appropriate personal protective equipment (see Section 8).

Advice on general occupational hygiene : p53-Luc Plasmid
Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

pFC-p53 Positive Control Plasmid
Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities : p53-Luc Plasmid
Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

pFC-p53 Positive Control Plasmid
Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits
None.

Appropriate engineering controls
Environmental exposure controls
: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures
: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection
: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection
: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection
: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection
: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection
: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 10. Stability and reactivity

**Reactivity**
- **p53-Luc Plasmid**
  - No specific test data related to reactivity available for this product or its ingredients.
- **pFC-p53 Positive Control Plasmid**
  - No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability**
- **p53-Luc Plasmid**
  - The product is stable.
- **pFC-p53 Positive Control Plasmid**
  - The product is stable.

**Possibility of hazardous reactions**
- **p53-Luc Plasmid**
  - Under normal conditions of storage and use, hazardous reactions will not occur.
- **pFC-p53 Positive Control Plasmid**
  - Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid**
- **p53-Luc Plasmid**
  - No specific data.
- **pFC-p53 Positive Control Plasmid**
  - No specific data.

**Incompatible materials**
- **p53-Luc Plasmid**
  - May react or be incompatible with oxidizing materials.
- **pFC-p53 Positive Control Plasmid**
  - May react or be incompatible with oxidizing materials.

**Hazardous decomposition products**
- **p53-Luc Plasmid**
  - Under normal conditions of storage and use, hazardous decomposition products should not be produced.
- **pFC-p53 Positive Control Plasmid**
  - Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

**Information on toxicological effects**

Section 11. Toxicological information

Carcinogenicity: p53-Luc Plasmid No known significant effects or critical hazards.

Mutagenicity: p53-Luc Plasmid No known significant effects or critical hazards.

Teratogenicity: p53-Luc Plasmid No known significant effects or critical hazards.

Developmental effects: p53-Luc Plasmid No known significant effects or critical hazards.

Fertility effects: p53-Luc Plasmid No known significant effects or critical hazards.

Numerical measures of toxicity

Acute toxicity estimates
N/A

Section 12. Ecological information

Toxicity
Not available.

Persistence and degradability
Not available.

Bioaccumulative potential
Not available.

Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
Section 14. Transport information

**TDG / IMDG / IATA**: Not regulated.

**Special precautions for user**: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according to Annex II of MARPOL and the IBC Code: Not available.

Section 15. Regulatory information

**Canadian lists**

- **Canadian NPRI**: None of the components are listed.
- **CEPA Toxic substances**: None of the components are listed.

**International regulations**

- **Chemical Weapon Convention List Schedules I, II & III Chemicals**: Not listed.
- **Montreal Protocol**: Not listed.
- **Stockholm Convention on Persistent Organic Pollutants**: Not listed.
- **UNECE Aarhus Protocol on POPs and Heavy Metals**: Not listed.

**Inventory list**

- **Australia**: All components are listed or exempted.
- **Canada**: All components are listed or exempted.
- **China**: All components are listed or exempted.
- **Europe**: All components are listed or exempted.
- **Japan**: Japan inventory (ENCS): All components are listed or exempted. Japan inventory (ISHL): All components are listed or exempted.
- **New Zealand**: All components are listed or exempted.
- **Philippines**: All components are listed or exempted.
- **Republic of Korea**: All components are listed or exempted.
- **Taiwan**: All components are listed or exempted.
- **Thailand**: Not determined.
- **Turkey**: Not determined.
- **United States**: All components are listed or exempted.
- **Viet Nam**: All components are listed or exempted.
