Conforms to Code of Practice for the Preparation of Safety Data Sheets for Hazardous Chemicals

SAFETY DATA SHEET

PathDetect NFAT cis Reporting System, Part Number 219094

Section 1. Identification

Product identifier : PathDetect NFAT cis Reporting System, Part Number 219094
Part no. (chemical kit) : 219094
Part no. : pNFAT-Luc Plasmid 219088-51
          pCIS-CK Negative Control Plasmid 219090-51

Supplier/Manufacturer : Agilent Technologies Australia Pty Ltd
                        679 Springvale Road
                        Mulgrave
                        Victoria 3170, Australia
                        1800 802 402

Emergency telephone number (with hours of operation) : CHEMTREC®: +(61)-290372994

Relevant identified uses of the substance or mixture and uses advised against

Material uses : Analytical reagent.

pNFAT-Luc Plasmid 0.05 ml (50 µg 1 µg/µl)
pCIS-CK Negative Control Plasmid 0.05 ml (50 µg 1 µg/µl)

Section 2. Hazard(s) identification

Classification of the substance or mixture
Not classified.

GHS label elements

Signal word : pNFAT-Luc Plasmid No signal word.
               pCIS-CK Negative Control Plasmid No signal word.

Hazard statements : pNFAT-Luc Plasmid No known significant effects or critical hazards.
                    pCIS-CK Negative Control Plasmid No known significant effects or critical hazards.

Precautionary statements

Prevention : pNFAT-Luc Plasmid Not applicable.
             pCIS-CK Negative Control Plasmid Not applicable.

Response : pNFAT-Luc Plasmid Not applicable.
           pCIS-CK Negative Control Plasmid Not applicable.

Storage : pNFAT-Luc Plasmid Not applicable.
          pCIS-CK Negative Control Plasmid Not applicable.

Disposal : pNFAT-Luc Plasmid Not applicable.
           pCIS-CK Negative Control Plasmid Not applicable.

Supplemental label elements

Additional warning phrases : pNFAT-Luc Plasmid Not applicable.
                            pCIS-CK Negative Control Plasmid Not applicable.

Date of issue/Date of revision : 23/12/2019
Date of previous issue : 31/12/2017
Version : 3
Section 2. Hazard(s) identification

Other hazards which do not result in classification:
- pNFAT-Luc Plasmid: None known.
- pCIS-CK Negative Control Plasmid: None known.

Section 3. Composition and ingredient information

Substance/mixture:
- pNFAT-Luc Plasmid: Mixture
- pCIS-CK Negative Control Plasmid: Mixture

CAS number/other identifiers:
There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact:
- pNFAT-Luc Plasmid
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
- pCIS-CK Negative Control Plasmid
  - Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Inhalation:
- pNFAT-Luc Plasmid
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
- pCIS-CK Negative Control Plasmid
  - Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.

Skin contact:
- pNFAT-Luc Plasmid
  - Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
- pCIS-CK Negative Control Plasmid
  - Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.

Ingestion:
- pNFAT-Luc Plasmid
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
- pCIS-CK Negative Control Plasmid
  - Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

Most important symptoms/effects, acute and delayed

Potential acute health effects:
- pNFAT-Luc Plasmid
  - No known significant effects or critical hazards.
- pCIS-CK Negative Control Plasmid
  - No known significant effects or critical hazards.

Date of issue/Date of revision: 23/12/2019
Date of previous issue: 31/12/2017
Version: 3
Section 4. First aid measures

Inhalation:
- pNFAT-Luc Plasmid: No known significant effects or critical hazards.
- pCIS-CK Negative Control Plasmid: No known significant effects or critical hazards.

Skin contact:
- pNFAT-Luc Plasmid: No known significant effects or critical hazards.
- pCIS-CK Negative Control Plasmid: No known significant effects or critical hazards.

Ingestion:
- pNFAT-Luc Plasmid: No known significant effects or critical hazards.
- pCIS-CK Negative Control Plasmid: No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact:
- pNFAT-Luc Plasmid: No specific data.
- pCIS-CK Negative Control Plasmid: No specific data.

Inhalation:
- pNFAT-Luc Plasmid: No specific data.
- pCIS-CK Negative Control Plasmid: No specific data.

Skin contact:
- pNFAT-Luc Plasmid: No specific data.
- pCIS-CK Negative Control Plasmid: No specific data.

Ingestion:
- pNFAT-Luc Plasmid: No specific data.
- pCIS-CK Negative Control Plasmid: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician:
- pNFAT-Luc Plasmid: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- pCIS-CK Negative Control Plasmid: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments:

Protection of first-aiders:
- pNFAT-Luc Plasmid: No action shall be taken involving any personal risk or without suitable training.
- pCIS-CK Negative Control Plasmid: No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Firefighting measures

Extinguishing media

Suitable extinguishing media:
- pNFAT-Luc Plasmid: Use an extinguishing agent suitable for the surrounding fire.
- pCIS-CK Negative Control Plasmid: Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media:
- pNFAT-Luc Plasmid: None known.
- pCIS-CK Negative Control Plasmid: None known.

Specific hazards arising from the chemical:
- pNFAT-Luc Plasmid: In a fire or if heated, a pressure increase will occur and the container may burst.
- pCIS-CK Negative Control Plasmid: In a fire or if heated, a pressure increase will occur and the container may burst.

Hazardous thermal decomposition products:
- pNFAT-Luc Plasmid: No specific data.
- pCIS-CK Negative Control Plasmid: No specific data.
Section 5. Firefighting measures

Special protective actions for fire-fighters
- **pNFAT-Luc Plasmid**: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
- **pCIS-CK Negative Control Plasmid**: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters
- **pNFAT-Luc Plasmid**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
- **pCIS-CK Negative Control Plasmid**: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
- **pNFAT-Luc Plasmid**: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
- **pCIS-CK Negative Control Plasmid**: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.

For emergency responders
- **pNFAT-Luc Plasmid**: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
- **pCIS-CK Negative Control Plasmid**: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions
- **pNFAT-Luc Plasmid**: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
- **pCIS-CK Negative Control Plasmid**: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and material for containment and cleaning up

For cleaning up
- **pNFAT-Luc Plasmid**: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- **pCIS-CK Negative Control**: Stop leak if without risk. Move containers from spill area.
### Section 6. Accidental release measures

Plasmid area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

### Section 7. Handling and storage

#### Precautions for safe handling

</tbody>
</table>

#### Conditions for safe storage, including any incompatibilities

| pNFAT-Luc Plasmid | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |
| pCIS-CK Negative Control Plasmid | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls and personal protection

#### Control parameters

None.

#### Occupational exposure limits

None.

#### Appropriate engineering controls

Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

**Date of issue/Date of revision**: 23/12/2019  **Date of previous issue**: 31/12/2017  **Version**: 3 5/11
Section 8. Exposure controls and personal protection

Environmental exposure controls
Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection
Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.

Skin protection

Hand protection
Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Body protection
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection
Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection
Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

Appearance

Physical state
- pNFAT-Luc Plasmid: Liquid.
- pCIS-CK Negative Control Plasmid: Liquid.

Colour
- pNFAT-Luc Plasmid: Not available.
- pCIS-CK Negative Control Plasmid: Not available.

Odour
- pNFAT-Luc Plasmid: Not available.
- pCIS-CK Negative Control Plasmid: Not available.

Odour threshold
- pNFAT-Luc Plasmid: Not available.
- pCIS-CK Negative Control Plasmid: Not available.

pH
- pNFAT-Luc Plasmid: 7.5
- pCIS-CK Negative Control Plasmid: 7.5

Melting point
- pNFAT-Luc Plasmid: 0°C (32°F)
- pCIS-CK Negative Control Plasmid: 0°C (32°F)

Boiling point
- pNFAT-Luc Plasmid: 100°C (212°F)
- pCIS-CK Negative Control Plasmid: 100°C (212°F)

Flash point
- pNFAT-Luc Plasmid: Not available.
- pCIS-CK Negative Control Plasmid: Not available.
Section 9. Physical and chemical properties

**Evaporation rate**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Flammability (solid, gas)**: pNFAT-Luc Plasmid Not applicable. pCIS-CK Negative Control Plasmid Not applicable.

**Lower and upper explosive (flammable) limits**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Vapour pressure**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Vapour density**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Relative density**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Solubility**: pNFAT-Luc Plasmid Easily soluble in the following materials: cold water and hot water. pCIS-CK Negative Control Plasmid Easily soluble in the following materials: cold water and hot water.

**Partition coefficient: n-octanol/water**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Auto-ignition temperature**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Decomposition temperature**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

**Viscosity**: pNFAT-Luc Plasmid Not available. pCIS-CK Negative Control Plasmid Not available.

Section 10. Stability and reactivity

**Reactivity**: pNFAT-Luc Plasmid No specific test data related to reactivity available for this product or its ingredients. pCIS-CK Negative Control Plasmid No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability**: pNFAT-Luc Plasmid The product is stable. pCIS-CK Negative Control Plasmid The product is stable.

**Possibility of hazardous reactions**: pNFAT-Luc Plasmid Under normal conditions of storage and use, hazardous reactions will not occur. pCIS-CK Negative Control Plasmid Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid**: pNFAT-Luc Plasmid No specific data. pCIS-CK Negative Control Plasmid No specific data.

**Incompatible materials**: pNFAT-Luc Plasmid May react or be incompatible with oxidising materials. pCIS-CK Negative Control Plasmid May react or be incompatible with oxidising materials.

## Section 11. Toxicological information

### General:
- **pNFAT-Luc Plasmid**: No known significant effects or critical hazards.
- **pCIS-CK Negative Control Plasmid**: No known significant effects or critical hazards.

### Carcinogenicity:
- **pNFAT-Luc Plasmid**: No known significant effects or critical hazards.
- **pCIS-CK Negative Control Plasmid**: No known significant effects or critical hazards.

### Mutagenicity:
- **pNFAT-Luc Plasmid**: No known significant effects or critical hazards.
- **pCIS-CK Negative Control Plasmid**: No known significant effects or critical hazards.

### Teratogenicity:
- **Developmental effects**:
  - **pNFAT-Luc Plasmid**: No known significant effects or critical hazards.
  - **pCIS-CK Negative Control Plasmid**: No known significant effects or critical hazards.
- **Fertility effects**:
  - **pNFAT-Luc Plasmid**: No known significant effects or critical hazards.
  - **pCIS-CK Negative Control Plasmid**: No known significant effects or critical hazards.

### Skin contact:
- **pNFAT-Luc Plasmid**: No specific data.
- **pCIS-CK Negative Control Plasmid**: No specific data.

### Inhalation:
- **pNFAT-Luc Plasmid**: No specific data.
- **pCIS-CK Negative Control Plasmid**: No specific data.

### Ingestion:
- **pNFAT-Luc Plasmid**: No specific data.
- **pCIS-CK Negative Control Plasmid**: No specific data.

### Potential chronic health effects

#### Short term exposure
- **Potential immediate effects**: Not available.
- **Potential delayed effects**: Not available.

#### Long term exposure
- **Potential immediate effects**: Not available.
- **Potential delayed effects**: Not available.

### Potential acute effects

#### N/A

### Numerical measures of toxicity

#### Acute toxicity estimates
- N/A

## Section 12. Ecological information

### Toxicity
- Not available.

### Persistence and degradability
- Not available.

### Bioaccumulative potential
- Not available.
Section 12. Ecological information

Not available.

**Mobility in soil**

Soil/water partition coefficient (K\text{oc}) : Not available.

**Other adverse effects**

: No known significant effects or critical hazards.

Section 13. Disposal considerations

**Disposal methods**

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

**ADG / IMDG / IATA**

: Not regulated as Dangerous Goods according to the ADG Code.

**Special precautions for user**

: Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**Transport in bulk according to Annex II of Marpol and the IBC Code**

: Not available.

Section 15. Regulatory information

**Standard Uniform Schedule of Medicine and Poisons**

Not regulated.

**Model Work Health and Safety Regulations - Scheduled Substances**

No listed substance

**International regulations**

**Chemical Weapon Convention List Schedules I, II & III Chemicals**

Not listed.

**Montreal Protocol (Annexes A, B, C, E)**

Not listed.

**Stockholm Convention on Persistent Organic Pollutants**

Not listed.

**Rotterdam Convention on Prior Informed Consent (PIC)**

Not listed.

**UNECE Aarhus Protocol on POPs and Heavy Metals**

Not listed.

**Inventory list**

**Australia**

: All components are listed or exempted.

Date of issue/Date of revision : 23/12/2019  
Date of previous issue : 31/12/2017  
Version : 3  
10/11
Section 15. Regulatory information

Canada : All components are listed or exempted.
China : All components are listed or exempted.
Europe : All components are listed or exempted.
Japan : Japan inventory (ENCS): All components are listed or exempted.
         Japan inventory (ISHL): All components are listed or exempted.
New Zealand : All components are listed or exempted.
Philippines : All components are listed or exempted.
Republic of Korea : All components are listed or exempted.
Taiwan : All components are listed or exempted.
Thailand : Not determined.
Turkey : Not determined.
United States : All components are listed or exempted.
Viet Nam : All components are listed or exempted.

Section 16. Any other relevant information

History
Date of issue/Date of revision : 23/12/2019
Date of previous issue : 31/12/2017
Version : 3
Key to abbreviations :
ADG = Australian Dangerous Goods
ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road
ATE = Acute Toxicity Estimate
BCF = Bioconcentration Factor
GHS = Globally Harmonized System of Classification and Labelling of Chemicals
IATA = International Air Transport Association
IBC = Intermediate Bulk Container
IMDG = International Maritime Dangerous Goods
LogPow = logarithm of the octanol/water partition coefficient
N/A = Not available
SUSMP = Standard Uniform Schedule of Medicine and Poisons
UN = United Nations
