# SAFETY DATA SHEET

Agilent Technologies

VL Primary Secondary Amine (PSA), 100g, Part Number 5610-2140

### Section 1. Identification

Product identifier Part no. Chemical identity	<ul> <li>VL Primary Secondary Amine (PSA), 100g, Part Number 5610-2140</li> <li>5610-2140</li> <li>PSA</li> </ul>
Relevant identified uses of the	e substance or mixture and uses advised against
Material uses	: Reagents and Standards for Analytical Chemistry Laboratory Use Bottle 100 g
Supplier/Manufacturer	: Agilent Technologies Australia Pty Ltd 679 Springvale Road Mulgrave Victoria 3170, Australia 1800 802 402
Emergency telephone number (with hours of operation)	: CHEMTREC®: +(61)-290372994

### Section 2. Hazard(s) identification

**Classification of the substance or mixture** Not classified.

GHS label elements	
Signal word	: No signal word.
Hazard statements	: No known significant effects or critical hazards.
Precautionary statements	
Prevention	: Not applicable.
Response	: Not applicable.
Storage	: Not applicable.
Disposal	: Not applicable.
Supplemental label elements	
Additional warning phrases	: Not applicable.

result in classification

Other hazards which do not : May form combustible dust concentrations in air.

### Section 3. Composition and ingredient information

Substance/mixture

: Substance

#### **CAS number/other identifiers**

Ingredient name	% (w/w)	CAS number
PSA	100	-

VL Primary Secondary Amine (PSA), 100g, Part Number 5610-2140

### Section 3. Composition and ingredient information

Note: The hazard information listed is based on unbonded silica gel CAS Number 112926-00-8. To the best of our knowledge, the acute and chronic toxicological properties of bonded silica gels have not been investigated. This product contains synthetic amorphous silica, and should not be confused with crystalline silica such as quartz, cristobalite, or tridymite, or with diatomaceous earth or other naturally occurring forms of amorphous silica that frequently contain crystalline forms of silica.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

. . .

### Section 4. First aid measures

t ald measures
: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
: Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.

#### Most important symptoms/effects, acute and delayed

#### Potential acute health effects Eye contact : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the eyes. Inhalation : Exposure to airborne concentrations above statutory or recommended exposure limits may cause irritation of the nose, throat and lungs. **Skin contact** : No known significant effects or critical hazards. Ingestion : No known significant effects or critical hazards. Over-exposure signs/symptoms Eye contact : Adverse symptoms may include the following: irritation redness Inhalation : Adverse symptoms may include the following: respiratory tract irritation coughing Skin contact : No specific data. Ingestion : No specific data. Indication of immediate medical attention and special treatment needed, if necessary Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed.

	The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

#### See toxicological information (Section 11)

2/9

### Section 5. Firefighting measures

Extinguishing media	
Suitable extinguishing media	: Use dry chemical powder.
Unsuitable extinguishing media	: Avoid high pressure media which could cause the formation of a potentially explosible dust-air mixture.
Specific hazards arising from the chemical	: May form explosible dust-air mixture if dispersed.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

Personal precautions, protec	tiv	ve equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

#### Methods and material for containment and cleaning up

Methods for cleaning up	: Move containers from spill area. Use spark-proof tools and explosion-proof
	equipment. Vacuum or sweep up material and place in a designated, labelled waste
	container. Dispose of via a licensed waste disposal contractor.

### Section 7. Handling and storage

### Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition sources. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material.
---------------------	--

### Section 7. Handling and storage

Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### Section 8. Exposure controls and personal protection

#### **Control parameters**

#### **Occupational exposure limits**

Ingredient name	Exposure limits
PSA	ACGIH TLV (United States). Particulates Not Otherwise Specified (PNOS): 10 mg/m <sup>3</sup> Form: Inhalable Particulates Not Otherwise Specified (PNOS): 3 mg/m <sup>3</sup> Form: Respirable

Appropriate engineering controls	: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-provventilation equipment.	
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensur- they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.	
Individual protection measured	<u>5</u>	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.	
Eye/face protection	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields. If operating conditions cause high dust concentrations to be produced use dust goggles.	ı
Skin protection		
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicate this is necessary.	
Body protection	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.	

### Section 8. Exposure controls and personal protection

Other skin protection	<ul> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.</li> </ul>
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

### Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

<u>Appearance</u>	
Physical state	: Solid. [Powder.]
Colour	: White./ Off-white.
Odour	: Faint odour.
Odour threshold	: Not available.
рН	: Not available.
Melting point/freezing point	: Not available.
Boiling point, initial boiling point, and boiling range	: Not available.
Flash point	: Not applicable.
Evaporation rate	: Not available.
Flammability	: Not available.
Lower and upper explosion limit/flammability limit	: Not applicable.
Vapour pressure	: Not available.
Relative vapour density	: Not applicable.
Relative density	: 2.5 to 3.5
Density	: 2.5 to 3.5 g/cm <sup>3</sup> [25°C (77°F)]
Solubility	: Insoluble in the following materials: cold water and hot water.
Partition coefficient: n- octanol/water	: Not available.
Auto-ignition temperature	: Not applicable.
Decomposition temperature	: Not available.
Viscosity	: Not applicable.
Particle characteristics	
Median particle size	: Not available.

### Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by earthing and bonding containers and equipment before transferring material. Prevent dust accumulation.
Date of issue/Date of revision	: 24/05/2022 Date of previous issue : No previous validation Version : 1 5/9

### Section 10. Stability and reactivity

Incompatible materials		Reactive or incompatible with the following materials: oxidising materials Incompatible with hydrogen fluoride.	
Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.	

## Section 11. Toxicological information

	•	
Information on toxicological	ifects	
Acute toxicity		
Not available.		
Irritation/Corrosion		
Not available.		
Sensitisation		
Not available.		
Mutagenicity		
Conclusion/Summary	Not available.	
<u>Carcinogenicity</u>		
Conclusion/Summary	Not available.	
Reproductive toxicity		
<b>Conclusion/Summary</b>	Not available.	
<b>Teratogenicity</b>		
Conclusion/Summary	Not available.	
Specific target organ toxicit	<u>(single exposure)</u>	
Not available.		
Specific target organ toxicit	(repeated exposure)	
Not available.		
Aspiration hazard		
Not available.		
Information on likely routes of exposure	Not available.	
Potential acute health effects		
Eye contact	<ul> <li>Exposure to airborne concentrations above statutory or recommended exposition in the eyes.</li> </ul>	sure
Inhalation	<ul> <li>Exposure to airborne concentrations above statutory or recommended exposition in the statutory of the nose, throat and lungs.</li> </ul>	sure
Skin contact	No known significant effects or critical hazards.	
Ingestion	No known significant effects or critical hazards.	
Sumptome related to the phy	cal, chemical and toxicological characteristics	
Eye contact	Adverse symptoms may include the following:	
	irritation redness	
Inhalation	Adverse symptoms may include the following:	
	respiratory tract irritation coughing	
Skin contact	No specific data.

### Section 11. Toxicological information

Ingestion

: No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure					
<u>Short term exposure</u>	Short term exposure				
Potential immediate effects	:	Not available.			
Potential delayed effects	:	Not available.			
<u>Long term exposure</u>					
Potential immediate effects	1	Not available.			
Potential delayed effects	:	Not available.			
Potential chronic health effects					
General	1	Repeated or prolonged inhalation of dust may lead to chronic respiratory irritation.			
Carcinogenicity	1	No known significant effects or critical hazards.			
Mutagenicity	1	No known significant effects or critical hazards.			
Reproductive toxicity	:	No known significant effects or critical hazards.			
Numerical measures of toxicity					

#### Numerical measures of toxicity

Acute toxicity estimates

N/A

### Section 12. Ecological information

#### **Toxicity**

Not available.

Persistence and degradability			
Conclusion/Summary	: Based on chemical experience, will degrade over very long period of time.		
Bioaccumulative potential			
Not available.			
Mobility in soil			
Soil/water partition coefficient (Koc)	: Not available.		
Other adverse effects	: No known significant effects or critical hazards.		

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

**Special precautions for user : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to IMO instruments
