SAFETY DATA SHEET

Agilent Technologies

Turbo Pump Lubricant TL 011, Part Number 6040-0468

Section 1. Identification

Product identifier Part no.		Turbo Pump Lubricant TL 011, Part Number 6040-0468 6040-0468
Relevant identified uses of the	e s	ubstance or mixture and uses advised against
Identified uses	:	Reagents and Standards for Analytical Chemistry Laboratory Use Lubricant. 250 ml
Supplier/Manufacturer	:	Agilent Technologies Australia Pty Ltd 679 Springvale Road Mulgrave Victoria 3170, Australia 1800 802 402
Emergency telephone number (with hours of operation)	:	CHEMTREC®: +(61)-290372994

Section 2. Hazard(s) identification

Classification of the substance or mixture

Not classified.

Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 10%

No signal word.
No known significant effects or critical hazards.
Not applicable.
Not applicable.
Not applicable.
Not applicable.
Not applicable.

Other hazards which do not : None known. result in classification

Section 3. Composition and ingredient information

Substance/mixture

: Mixture

CAS number/other identifiers

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

Section 4. First aid measures

Description of necess	ary first aid measures
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.
Skin contact	 Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur.
Ingestion	: ₩ash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Most important sympt	oms/effects, acute and delayed
Potential acute healt	h effects
Eve contact	No known significant offacts or critical bazards

Eye contact	: No known significant effects or critical hazards.			
Inhalation	: No known significant effects or critical hazards.			
Skin contact	: No known significant effects or critical hazards.			
Ingestion	: No known significant effects or critical hazards.			
Over-exposure signs/symptoms				

Eye contact	: No specific data.
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician	: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

See toxicological information (Section 11)

Section 5. Firefighting measures

: Use an extinguishing agent suitable for the surrounding fire.
: None known.
: In a fire or if heated, a pressure increase will occur and the container may burst.
: Decomposition products may include the following materials: carbon dioxide carbon monoxide
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

 Date of issue/Date of revision
 : 19/05/2023
 Date of previous issue
 : 11/06/2020
 Version
 : 4

Section 6. Accidental release measures

Personal precautions, protec	tiv	e equipment and emergency procedures
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Put on appropriate personal protective equipment.
For emergency responders	-	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and material for con		inment and cleaning up

Methods for cleaning up	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop
	up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry
	material and place in an appropriate waste disposal container. Dispose of via a
	licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling		
Protective measures	ut on appropriate personal protective equipment (see Section 8).	
Advice on general occupational hygiene	ating, drinking and smoking should be prohibited in areas where this ma andled, stored and processed. Workers should wash hands and face be ating, drinking and smoking. Remove contaminated clothing and protec quipment before entering eating areas. See also Section 8 for additiona formation on hygiene measures.	efore tive
Conditions for safe storage, including any incompatibilities	tore in accordance with local regulations. Store in original container pro om direct sunlight in a dry, cool and well-ventilated area, away from inco- naterials (see Section 10) and food and drink. Keep container tightly close ealed until ready for use. Containers that have been opened must be ca esealed and kept upright to prevent leakage. Do not store in unlabelled se appropriate containment to avoid environmental contamination. See or incompatible materials before handling or use.	mpatible sed and refully containers.

3/8

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits

Ingredient name	Exposure limits
	ACGIH TLV (United States). TWA: 0.5 mg/m³, (Barium) Form: Air contaminant

Biological exposure indices

No exposure indices known.

Appropriate engineering controls	:	Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Date of issue/Date of revision	: 19/05/2023	Date of previous issue	: 11/06/2020	Version : 4
--------------------------------	--------------	------------------------	--------------	-------------

Section 8. Exposure controls and personal protection

Individual protection measures	
Hygiene measures :	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection :	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection :	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.
Body protection :	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection :	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection :	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

Appearance							
Physical state	1	Liquid. [Fluid.]					
Colour	1	Not available.					
Odour	1	Not available.					
Odour threshold	:	Not available.					
рН	:	Not applicable.					
Melting point/freezing point	1	-60°C (-76°F)					
Boiling point, initial boiling point, and boiling range	:	Not available.					
Flash point	:	Closed cup: 220°C (428°F	.)				
Evaporation rate	:	Not available.					
Flammability	:	Not applicable.	Not applicable.				
Lower and upper explosion limit/flammability limit	:	Not available.					
Vapour pressure	:	Not available.					
Relative vapour density	:	Not available.					
Relative density	:	0.947					
Density	:	0.947 g/cm3 [20°C (68°F)]					
Solubility(ies)	:	Media	Result				
		water Insoluble					
Miscible with water	:	No.					
Partition coefficient: n- octanol/water	:	Not applicable.					

Date of issue/Date of revision

Section 9. Physical and chemical properties and safety characteristics

Auto-ignition temperature	: Not available.
Decomposition temperature	: Not available.
Viscosity	: K inematic (40°C (104°F)): 10.5 mm²/s (10.5 cSt)
Particle characteristics	
Median particle size	: Not applicable.

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: No specific data.
Incompatible materials	: May react or be incompatible with oxidising materials.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects .

Acute toxicity Not available.	
Irritation/Corrosion Not available.	
<u>Sensitisation</u> Not available.	
<u>Mutagenicity</u> Conclusion/Summary	: Not available.
Carcinogenicity Conclusion/Summary	: Not available.
Reproductive toxicity Conclusion/Summary Teratogenicity	: Not available.
Conclusion/Summary Specific target organ toxic	: Not available. city (single exposure)
Not available. Specific target organ toxic Not available.	<u>:ity (repeated exposure)</u>
Aspiration hazard Not available.	

Information on likely routes : Not available. of exposure

Acute toxicity estimates

Section 12. Ecological information

Toxicity

Not available.

Persistence and degradabilit Not available.	2
Bioaccumulative potential Not available.	
Mobility in soil Soil/water partition coefficient (Koc)	: Not available.
Other adverse effects	: No known significant effects or critical hazards.

Date of issue/Date of revision	: 19/05/2023	Date of previous issue	: 11/06/2020	Version : 4	6/8
--------------------------------	--------------	------------------------	--------------	-------------	-----

Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with
	some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

ADG / IMDG / IATA	:	Not regulated as Dangerous Goods according to the ADG Code .
Special precautions for user	:	Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not available. to IMO instruments

Section 15. Regulatory information
