Conforms to Code of Practice for the Preparation of Safety Data Sheets for Hazardous Chemicals

# **SAFETY DATA SHEET**

ZORBAX PrepHT XDB-C8 Chromatography Columns with Acetonitrile and Water 10 to 30mL

# Section 1. Identification

This product is considered an article. This Safety Data Sheet is written based on the encapsulated substance or mixture in this article.

| Product identifier   | : ZORBAX PrepHT XDB-C8 Chromatography Columns with Acetonitrile and Water<br>10 to 30mL  |
|--|--|
| Part no.   | : 970050-906, 970100-906   |
| Relevant identified uses of                                | the substance or mixture and uses advised against  |
| Identified uses  | : Analytical chemistry.<br>HPLC column<br>Solvent volume: 10 - 30 ml<br>970050-906 PrepHT, ZORBAX, XDB-C8, 21.2x50mm, 5u Cart, 10.6mL solvent<br>970100-906 PrepHT, ZORBAX, XDB-C8, 21.2x100mm, 5u,Crt, 21.2mL solvent |
| Supplier/Manufacturer                                      | : Agilent Technologies Australia Pty Ltd<br>679 Springvale Road<br>Mulgrave<br>Victoria 3170, Australia<br>1800 802 402  |
| Emergency telephone<br>number (with hours of<br>operation) | : CHEMTREC®: +(61)-290372994   |

# Section 2. Hazard(s) identification

This article, when used under reasonable conditions and in accordance with the directions for use, should not present a health hazard. The substance or mixture is encapsulated in the article. Only if released due to use or processing of the article in a manner not in accordance with the product's directions for use it may present potential health and safety hazards.

| Classification of the substan | <u>ce or mixture</u>  |
|-------------------------------|---|
| H225                          | FLAMMABLE LIQUIDS - Category 2  |
| H318                          | SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1  |
| GHS label elements            |   |
| Hazard pictograms             |   |
| Signal word                   | : DANGER  |
| Hazard statements             | : H225 - Highly flammable liquid and vapour.<br>H318 - Causes serious eye damage.   |
| Precautionary statements      |   |
| Prevention                    | <ul> <li>P280 - Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> </ul>  |
| Response                      | <ul> <li>P305 + P351 + P338, P310 - IF IN EYES: Rinse cautiously with water for several<br/>minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br/>Immediately call a POISON CENTER or doctor.</li> </ul> |
| Storage                       | : Not applicable.   |
| Disposal                      | <ul> <li>P501 - Dispose of contents and container in accordance with all local, regional,<br/>national and international regulations.</li> </ul>  |

# Section 2. Hazard(s) identification

#### Supplemental label elements

Additional warning : Not applicable. phrases

Other hazards which do not : None known. result in classification

# Section 3. Composition and ingredient information

This article, when used under reasonable conditions and in accordance with the directions for use, should not present a health hazard. The substance or mixture is encapsulated in the article. Only if released due to use or processing of the article in a manner not in accordance with the product's directions for use it may present potential health and safety hazards.

Substance/mixture

: Mixture (encapsulated in article)

#### **CAS number/other identifiers**

| Ingredient name                | % (w/w)   | CAS number |
|--------------------------------|-----------|------------|
| Organosilane bonded silica gel | ≥60 - ≤75 | -          |
| Acetonitrile                   | ≥10 - <25 | 75-05-8    |

Contains : Organosilane bonded silica gel.

Note: To the best of our knowledge, the acute and chronic toxicological properties of bonded silica gels have not been investigated. This product contains synthetic amorphous silica, and should not be confused with crystalline silica such as guartz, cristobalite, or tridymite, or with diatomaceous earth or other naturally occurring forms of amorphous silica that frequently contain crystalline forms of silica.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

| Description of necessary fire | st aid measures   |
|-------------------------------|---|
| Eye contact                   | : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.  |
| Inhalation                    | : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
| Skin contact                  | : Get medical attention immediately. Call a poison center or physician. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |

# Section 4. First aid measures

| Section 4. 1 1151 a         |  |
|-----------------------------|--|
| Ingestion                   | : Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
| Most important symptoms/    |  |
| Potential acute health effe |  |
| Eye contact                 | : Causes serious eye damage.   |
| Inhalation                  | : No known significant effects or critical hazards.  |
| Skin contact                | : No known significant effects or critical hazards.  |
| Ingestion                   | : No known significant effects or critical hazards.  |
| Over-exposure signs/sym     | <u>otoms</u>   |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                  | : No specific data.  |
| Skin contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur   |
| Ingestion                   | : Adverse symptoms may include the following:<br>stomach pains   |
| Indication of immediate me  | dical attention and special treatment needed, if necessary   |
| Notes to physician          | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.   |
| Specific treatments         | : No specific treatment.   |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

See toxicological information (Section 11)

# Section 5. Firefighting measures

| Extinguishing media                        |   |
|--|---|
| Suitable extinguishing media               | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media             | : Do not use water jet.   |
| Specific hazards arising from the chemical | : Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. |

# Section 5. Firefighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>metal oxide/oxides<br>cyanides  |
|--|--|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |
| Hazchem code                                   | : 1Z   |
|  |  |

# Section 6. Accidental release measures

| Personal precautions, protec   | tiv | e equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods and material for con   | tai | nment and cleaning up   |
| Methods for cleaning up        | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

# Section 7. Handling and storage

| Conditions for safe storage, | 1 | Store in accordance with local regulations. Store in a segregated and approved            |
|------------------------------|---|---|
| including any                |   | area. Store in original container protected from direct sunlight in a dry, cool and well- |
| incompatibilities            |   | ventilated area, away from incompatible materials (see Section 10) and food and           |
|                              |   | drink. Store locked up. Eliminate all ignition sources. Separate from oxidising           |
|                              |   | materials. Keep container tightly closed and sealed until ready for use. Containers       |
|                              |   | that have been opened must be carefully resealed and kept upright to prevent              |
|                              |   | leakage. Do not store in unlabelled containers. Use appropriate containment to            |
|                              |   | avoid environmental contamination. See Section 10 for incompatible materials              |
|                              |   | before handling or use.   |

# Section 8. Exposure controls and personal protection

Since the hazardous ingredient in this article is encapsulated, the risk of exposure by inhalation, ingestion, skin contact and eyes contact is minimum.

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                | Exposure limits  |  |
|--------------------------------|--|--|
| Organosilane bonded silica gel | ACGIH TLV (United States).<br>Particulate matter not otherwise classified:<br>(PNOC).: 10 mg/m <sup>3</sup> Form: Inhalable<br>Particulate matter not otherwise classified:<br>(PNOC).: 3 mg/m <sup>3</sup> Form: Respirable |  |
| Acetonitrile                   | Safe Work Australia (Australia, 10/2022).<br>Absorbed through skin.<br>STEL: 101 mg/m <sup>3</sup> 15 minutes.<br>STEL: 60 ppm 15 minutes.<br>TWA: 67 mg/m <sup>3</sup> 8 hours.<br>TWA: 40 ppm 8 hours.                     |  |

#### **Biological exposure indices**

No exposure indices known.

| Appropriate engineering : controls | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
|------------------------------------|---|
| Environmental exposure : controls  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measures     |   |
| Hygiene measures :                 | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection :              | Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>gases or dusts. If contact is possible, the following protection should be worn,<br>unless the assessment indicates a higher degree of protection: chemical splash<br>goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be<br>required instead. |
| Skin protection                    |   |

ZORBAX PrepHT XDB-C8 Chromatography Columns with Acetonitrile and Water 10 to 30mL

# Section 8. Exposure controls and personal protection

| I have does not be at the set |   |
|-------------------------------|---|
| Hand protection               | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection               | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection         | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection        | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |
| Section 0 Devoice             | and chamical properties and cafety  |

# Section 9. Physical and chemical properties and safety characteristics

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| <u>Appearance</u>                                       |   |                                  |                |           |                      |                                   |      |        |  |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidising materials<br>Incompatible with hydrogen fluoride.   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

# Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result                 | Species | Dose       | Exposure |
|-------------------------|------------------------|---------|------------|----------|
| Acetonitrile            | LC50 Inhalation Vapour | Rat     | 17100 ppm  | 4 hours  |
|                         | LD50 Oral              | Rat     | 2460 mg/kg | -        |

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species | Score | Exposure           | Observation |
|-------------------------|--------------------------|---------|-------|--------------------|-------------|
| Acetonitrile            | Eyes - Moderate irritant | Rabbit  |       | 24 hours 100<br>uL | -           |
|                         | Skin - Mild irritant     | Rabbit  | -     | 500 mg             | -           |

#### Mobility in soil

Soil/water partition: Not available.coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

ZORBAX PrepHT XDB-C8 Chromatography Columns with Acetonitrile and Water 10 to 30mL

# Section 14. Transport information

This Safety Data Sheet is written based on the encapsulated substance or mixture in this article. Since the hazardous ingredient is encapsulated, the risk of exposure by inhalation, ingestion, skin contact and eyes contact is minimum.
