Warranty

Products manufactured by Seller are warranted against defects in materials and workmanship for twelve (12) months from date of shipment thereof to Customer, and Seller’s liability under valid warranty claims is limited, at the option of Seller, to repair, replacement, or refund an equitable portion of the purchase price of the Product. Items expendable in normal use are not covered by this warranty. All warranty replacement or repair of parts shall be limited to equipment malfunctions which, in the sole opinion of Seller, are due or traceable to defects in original materials or workmanship. All obligations of Seller under this warranty shall cease in the event of abuse, accident, alteration, misuse, or neglect of the equipment. In-warranty repaired or replaced parts are warranted only for the remaining unexpired portion of the original warranty period applicable to the repaired or replaced parts. After expiration of the applicable warranty period, Customer shall be charged at the then current prices for parts, labor, and transportation.

When products are used with toxic chemicals, or in an atmosphere that is dangerous to the health of humans, or is environmentally unsafe, it will be the responsibility of the Customer to have the product cleaned by an independent agency skilled and approved in handling and cleaning contaminated materials before the product will be accepted by Agilent, Inc. for repair and/or replacement.

Reasonable care must be used to avoid hazards. Seller expressly disclaims responsibility for loss or damage caused by use of its Products other than in accordance with proper operating procedures. Except as stated herein, Seller makes no warranty, express or implied (either in fact or by operation of law), statutory or otherwise; and, except as stated herein, Seller shall have no liability under any warranty, express or implied (either in fact or by operation of law), statutory or otherwise. Statements made by any person, including representatives of Seller, which are inconsistent or in conflict with the terms of this warranty shall not be binding upon Seller unless reduced to writing and approved by an officer of Seller.

Disclaimer

Operation and maintenance of this equipment involves serious risk. It is the responsibility of the user to maintain safe operating conditions at all times. Agilent assumes no liability for personal injury or damage resulting from operation or service of the equipment.

Agilent has no control over the use of this equipment and is not responsible for personal injury or damage resulting from its use. The safe use and disposal of hazardous or potentially hazardous materials of any kind is the sole responsibility of the user. Observe all WARNINGS and CAUTIONS to minimize the serious hazards involved.

It is the sole responsibility of the users of Agilent equipment to comply with all local, state and federal safety requirements (laws and regulations) applicable to their system. Employ the services of an industrial hygienist and/or a qualified chemical safety engineer in order to ensure safe installation and use.
Warranty Replacement and Adjustment

All claims under warranty must be made promptly after occurrence of circumstances giving rise thereto, and must be received within the applicable warranty period by Seller or its authorized representative. Such claims should include the Product serial number, the date of shipment, and a full description of the circumstances giving rise to the claim. Before any Products are returned for repair and/or adjustment, written authorization from Seller or its authorized representative for the return and instructions as to how and where these Products should be returned must be obtained. Any Product returned to Seller for examination shall be prepaid via the means of transportation indicated as acceptable by Seller. Seller reserves the right to reject any warranty claim not promptly reported and any warranty claim on any item that has been altered or has been returned by non-acceptable means of transportation. When any Product is returned for examination and inspection, or for any other reason, Customer shall be responsible for all damage resulting from improper packing or handling, and for loss in transit, notwithstanding any defect or non-conformity in the Product. In all cases, Seller has the sole responsibility for determining the cause and nature of failure, and Seller’s determination with regard thereto shall be final.

If it is found that Seller’s Product has been returned without cause and is still serviceable, Customer will be notified and the Product returned at its expense; in addition, a charge for testing and examination may be made on Products so returned.

Documentation Conventions

This manual uses the following documentation conventions:

**WARNING**

*Warnings indicate a particular procedure or practice, which if not followed correctly, could lead to serious injury.*

**CAUTION**

*Cautions indicate a particular procedure or practice, which if not followed, could cause damage to the equipment.*

**NOTE**

*Notes contain important information.*

Before operating or servicing equipment, read and thoroughly understand all operation/maintenance manuals provided by Agilent. Be aware of the hazards associated with this equipment, know how to recognize potentially hazardous conditions, and how to avoid them. Read carefully and strictly observe all cautions and warnings. The consequences of unskilled, improper, or careless operation of the equipment can be serious.

In addition, consult local, state, and national agencies regarding specific requirements and regulations. Address any safety, operation, and/or maintenance questions to your nearest Agilent office.
Description

The Simulator (L7383-101 E type, and L7383-301 P type) is intended to be a convenient tool for verifying proper operation of the TC control unit. For those cases when the target gauge tube cannot be brought to proper pressure levels for true in-situ calibration, use the Simulator to at least ensure the control unit is calibrated to the average tube.

Operation

Normally, the Simulator is plugged into the target gauge cable at the sensor end. When the switch is set, the ATM the controller should read approximately $1 \times 10^5$ Pa (760 Torr, 1000 mBar). If desired, the controller can be calibrated by pressing the <ATM> button on the MultiGauge or the <CAL> button on the Sentorr. Sliding the switch to VAC causes the controller to read approximately $1.33 \times 10^{-1}$ Pa (1 mT, $1.3 \times 10^{-3}$ mBar). Again, the controller can be calibrated by pressing the appropriate button on the controller keypad.

NOTE

The Simulator is not intended to take the place of NIST-traceable calibration. The product is intended to verify the functionality of control electronics. For those situations requiring NIST-traceable calibration, Agilent offers the comprehensive STARRS Program. Contact Agilent for more information.

Important:

- E type controllers require L7383-101
- P type controllers require L7383-301

Vacuum Products Division
Instructions for returning products

Dear Customer:

Please follow these instructions whenever one of our products needs to be returned.

1) Complete the attached Request for Return form and send it to Agilent Technologies (see below), taking particular care to identify all products that have pumped or been exposed to any toxic or hazardous materials.

2) After evaluating the information, Agilent Technologies will provide you with a Return Authorization (RA) number via email or fax, as requested.
   Note: Depending on the type of return, a Purchase Order may be required at the time the Request for Return is submitted. We will quote any necessary services (evaluation, repair, special cleaning, eg).

3) Important steps for the shipment of returning product:
   • Remove all accessories from the core product (e.g. inlet screens, vent valves).
   • Prior to shipment, drain any oils or other liquids, purge or flush all gasses, and wipe off any excess residue.
   • If ordering an Advance Exchange product, please use the packaging from the Advance Exchange to return the defective product.
   • Seal the product in a plastic bag, and package product carefully to avoid damage in transit. You are responsible for loss or damage in transit.
   • Agilent Technologies is not responsible for returning customer provided packaging or containers.
   • Clearly label package with RA number. Using the shipping label provided will ensure the proper address and RA number are on the package. Packages shipped to Agilent without a RA clearly written on the outside cannot be accepted and will be returned.

4) Return only products for which the RA was issued.

5) Product being returned under a RA must be received within 15 business days.

6) Ship to the location specified on the printable label, which will be sent, along with the RA number, as soon as we have received all of the required information. Customer is responsible for freight charges on returning product.

7) Return shipments must comply with all applicable Shipping Regulations (IATA, DOT, etc.) and carrier requirements.

RETURN THE COMPLETED REQUEST FOR RETURN FORM TO YOUR NEAREST LOCATION:

3) TYPE OF RETURN  (Choose one from each row and supply Purchase Order if requesting a billable service)

3A. □ Non-Billable  □ Billable  ⇒ New PO # (hard copy must be submitted with this form):

3B. □ Exchange  □ Repair  □ Upgrade  □ Consignment/Demo  □ Calibration  □ Evaluation  □ Return for Credit

4) HEALTH and SAFETY CERTIFICATION

AGILENT TECHNOLOGIES CANNOT ACCEPT ANY PRODUCTS CONTAMINATED WITH BIOLOGICAL OR EXPLOSIVE HAZARDS, RADIOACTIVE MATERIAL, OR MERCURY AT ITS FACILITY.

Call Agilent Technologies to discuss alternatives if this requirement presents a problem.

The equipment listed above (check one):

□ HAS NOT pumped or been exposed to any toxic or hazardous materials.  OR
□ HAS pumped or been exposed to the following toxic or hazardous materials.  If this box is checked, the following information must also be filled out.  Check boxes for all materials to which product(s) pumped or was exposed:

□ Toxic  □ Corrosive  □ Reactive  □ Flammable  □ Explosive  □ Biological  □ Radioactive

List all toxic/hazardous materials. Include product name, chemical name, and chemical symbol or formula:

_________________________________________________________________________________________________________________________________________

NOTE: If a product is received at Agilent which is contaminated with a toxic or hazardous material that was not disclosed, the customer will be held responsible for all costs incurred to ensure the safe handling of the product, and is liable for any harm or injury to Agilent employees as well as to any third party occurring as a result of exposure to toxic or hazardous materials present in the product.

### TURBO PUMPS/CONTROLLERS

- Bad feedthrough
- Vacuum leak
- Error code on display

### LEAK DETECTORS

- Cannot calibrate
- Vacuum system unstable
- Failed to start

### VALVES/COMPONENTS

- Main seal leak
- Solenoid failure
- Damaged sealing area

- No zero/high backround
- Cannot reach test mode

### INSTRUMENTS

- Gauge tube not working
- Communication failure
- Error code on display

### DIFFUSION PUMPS

- Heater failure
- Doesn’t reach vacuum
- Vacuum leak

- Electrical problem
- Over temperature
- Other

### ADDITIONAL TERMS

Please read the terms and conditions below as they apply to all returns and are in addition to the Agilent Technologies Vacuum Product Division – Products and Services Terms of Sale.

- **Customer is responsible for the freight charges for the returning product.** Return shipments must comply with all applicable Shipping Regulations (IATA, DOT, etc.) and carrier requirements.
- **Customers receiving an Advance Exchange product agree to return the defective, rebuildable part to Agilent Technologies within 15 business days.** Failure to do so, or returning a non-rebuildable part (crashed), will result in an invoice for the non-returned/non-rebuildable part.
- Returns for credit toward the purchase of new or refurbished Products are subject to prior Agilent approval and may incur a restocking fee. Please reference the original purchase order number.
- Units returned for evaluation will be evaluated, and a quote for repair will be issued. If you choose to have the unit repaired, the cost of the evaluation will be deducted from the final repair pricing. A Purchase Order for the final repair price should be issued within 3 weeks of quotation date. Units without a Purchase Order for repair will be returned to the customer, and the evaluation fee will be invoiced.
- A Special Cleaning fee will apply to all exposed products per Section 4 of this document.
- If requesting a calibration service, units must be functionally capable of being calibrated.
