For cross-references within this document, the symbol (→ XY) is used, for cross-references to further documents, listed under "Further Information", the symbol (→ [Z]).
Product Identification

In all communications with Agilent, please specify the information on the product nameplate. For convenient reference copy that information into the space provided below:

![Product Nameplate](image)

Validity

This document applies to products with part number AGD100. The part number (PN) can be taken from the product nameplate.

This document is based on firmware number F-2.xx. If your unit does not work as described in this document, please check that it is equipped with the above firmware version (→ 22).

We reserve the right to make technical changes without prior notice.

All dimensions are indicated in mm.
Intended Use
The Vacuum Gauge Display AGD-100 is used together with an Agilent
- Pirani Standard Gauge of the PVG-5xx series
- Pirani Capacitance Diaphragm Gauge of the PCG-75x series
- Inverted Magnetron Pirani Gauge of the FRG-70x series
for total pressure measurement. All products must be operated in accordance with their respective Instruction Manuals.

Scope of Delivery
1× Vacuum Gauge Display
1× Power cord
1× Instruction Manual
## 1 Safety

### 1.1 Symbols Used

<table>
<thead>
<tr>
<th>Symbol</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="stop.png" alt="DANGER" /></td>
<td>Information on preventing any kind of physical injury.</td>
</tr>
<tr>
<td><img src="exclamation.png" alt="WARNING" /></td>
<td>Information on preventing extensive equipment and environmental damage.</td>
</tr>
<tr>
<td><img src="exclamation.png" alt="Caution" /></td>
<td>Information on correct handling or use. Disregard can lead to malfunctions or minor equipment damage.</td>
</tr>
</tbody>
</table>

**Further symbols**

- ![Lamp](light.png): The lamp/display is lit.
- ![Lamp](dark.png): The lamp/display is dark.
- ![Key](key.png): Press the key (example: 'set' key).
- ![No Key](no_key.png): Do not press any key.
1.2 Personnel Qualifications

Skilled personnel

All work described in this document may only be carried out by persons who have suitable technical training and the necessary experience or who have been instructed by the end-user of the product.

1.3 General Safety Instructions

Adhere to the applicable regulations and take the necessary precautions for all work you are going to do and consider the safety instructions in this document.

DANGER: mains voltage

Contact with live parts is extremely hazardous when any liquids penetrate into the unit.

Make sure no liquids penetrate into the equipment.
Disconnecting device

The disconnecting device must be readily identifiable and easily reached by the user.

To disconnect the controller from mains, you must unplug the mains cable.

Communicate the safety instructions to all other users.

1.4 Liability and Warranty

Agilent assumes no liability and the warranty becomes null and void if the end-user or third parties

- disregard the information in this document
- use the product in a non-conforming manner
- make any kind of interventions (modifications, alterations etc.) on the product
- use the product with accessories not listed in the product documentation.

## Operation

| Front panel           | via 3 keys           |
Vacuum Gauge Display AGD-100

Measurement values

Measurement range
(air, O₂, CO, N₂)

5×10⁻⁴ ... 1000 mbar
(+1.9 ... +10.0 VDC)

(→ [1],[3],[4])

Measurement error
Gain error
≤0.02% FSr

Offset error
≤0.05% FSr

Measurement rate
30 / s

Display rate
50 / s

Filter time constant
150 ms (f_g = 1 Hz)

Pressure units
mbar, Pa, Torr

Gauge supply

Voltage
+24 VDC ±5%

Current
750 mA

Power consumption
18 W

Fuse protection
900 mA with PTC element, self-resetting after turning the AGD-100 off or disconnecting the gauge

Switching function

Number
1

Reaction delay
≤10 ms if switching threshold close to measurement value (for larger differences consider filter time constant).

Adjustment range

PVG
1×10⁻³ ... 500 mbar
default 1×10⁻³ mbar

PCG
1×10⁻⁴ ... 500 mbar
default 1×10⁻⁴ mbar

FRG
1×10⁻⁸ ... 500 mbar
default 1×10⁻⁸ mbar

Hysteresis
≥10% of measurement value
Vacuum Gauge Display AGD-100

**Switching function relay**
- Contact type: floating changeover contact
- Load max.: 60 VDC, 1 A (ohmic)
  50 VAC, 5 A (ohmic)
- Service life:
  - Mechanic: $10^8$ cycles
  - Electric: $10^5$ cycles (at maximum load)
- Contact positions: → 20
- OUTPUT connector: 9-pin D-Sub, male
  (pin assignment → 20)

**Analog output**
- Number: 1
- Voltage range: 0 … +10 V
- Internal resistance: 660 Ω
- Measurement signal vs. pressure: logarithmic, 1.286 V/decade
- OUTPUT connector: 9-pin D-Sub, male
  (pin assignment → 20)

**Dimensions [mm]**

Use: For incorporation into a control panel
Weight: 0.85 kg
3 Installation

DANGER

DANGER: damaged product
Putting a damaged product into operation can be extremely hazardous.
In case of visible damages, make sure the product is not put into operation.

3.1 Installation in a Control Panel

The AGD-100 is suited for incorporation into a control panel.

DANGER

DANGER: protection class of the control panel
If the product is installed in a rack, it is likely to lower the protection class of the rack (protection against foreign bodies and water) e.g. according to the EN 60204-1 regulations for switching cabinets. Take appropriate measures for the control panel to meet the specifications of the protection class.
Vacuum Gauge Display AGD-100

For mounting the AGD-100 into a control panel, the following cut-out is required:

![Cut-Out Diagram]

The admissible maximum ambient temperature (→ 12) must not be exceeded neither the air circulation obstructed.

For reducing the mechanical strain on the front panel, preferably support the unit.

Slide the AGD-100 into the cut-out of the control panel ...

... and secure it with four M3 or equivalent screws.
3.2 Mains Power Connector

**DANGER**

DANGER: line voltage
Incorrectly grounded products can be extremely hazardous in the event of a fault.
Use only a 3-conductor power cable (3×1.5 mm²) with protective ground. The power connector may only be plugged into a socket with a protective ground. The protection must not be nullified by an extension cable without protective ground.

The unit is supplied with a 2 m power cord. If the mains cable is not compatible with your system, use your own, suitable cable with protective ground.

The socket must be fuse-protected with 10 A_{max}

If the unit is installed in a switch cabinet, the mains voltage should be supplied and turned on via a central power distributor.
Grounding

On the rear of the unit, there is a screw which can be used to connect the unit to ground, e.g. using the grounding of the pumping station.

3.3 SENSOR Connector

Connect the gauge to the SENSOR connector on the rear of the unit. Use a screened 1:1 cable (electromagnetic compatibility). Make sure the gauge is compatible (→ 12).

DANGER: protective low voltage

According to EN 61010, voltages exceeding 30 VAC or 60 VDC are hazardous. Only connect a protective low voltage (SELV).
Pin assignment SENSOR

Pin assignment of the 8-pin RJ45 appliance connector:

<table>
<thead>
<tr>
<th>Pin</th>
<th>Signal</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>Identification</td>
</tr>
<tr>
<td>1</td>
<td>Supply +24 VDC</td>
</tr>
<tr>
<td>2</td>
<td>Supply common GND</td>
</tr>
<tr>
<td>3</td>
<td>Signal input (Measurement signal+)</td>
</tr>
<tr>
<td>5</td>
<td>Signal common (Measurement signal-)</td>
</tr>
<tr>
<td>6</td>
<td>not connected</td>
</tr>
<tr>
<td>7</td>
<td>not connected</td>
</tr>
<tr>
<td>8</td>
<td>not connected</td>
</tr>
</tbody>
</table>

3.4 OUTPUT Connector

This connector allows to read the measurement signal and to evaluate state of the floating switching function.

Connect the peripheral components to the OUTPUT connector on the rear of the unit. Use a screened cable (electromagnetic compatibility).
DANGER: protective low voltage
According to EN 61010, voltages exceeding 30 VAC or 60 VDC are hazardous.
Only connect a protective low voltage (SELV).

Pin assignment, Contact positions OUTPUT

Pin assignment of the female 9-pin D-Sub appliance connector:

<table>
<thead>
<tr>
<th>Pin</th>

</tbody>
</table>
4 Operation

4.1 Front Panel

Measurement value in floating point or exponential format or status messages

FAIL

Switching function status

Threshold

Warning/error

Pressure unit

mBar Torr Pa

Operator keys

set
4.2 Turning the AGD-100 On and Off

Make sure the AGD-100 is correctly installed and the specifications in the Technical Data are met.

Turning the AGD-100 on

The power switch is on the rear of the unit.

Turn the AGD-100 on with the power switch (or centrally, via a switched power distributor, if the unit is incorporated in a rack).

After power on, the AGD-100 ...

- automatically performs a self-test
- displays the firmware version F-2.xx for 3 s
- displays the gauge type for 3 s
- activates the parameters that were in effect before the last power off
- switches to the Measurement mode

Turning the AGD-100 off

Turn the AGD-100 off with the power switch (or centrally, via a switched power distributor, if the unit is incorporated in a rack).

Wait at least 10 s before turning the AGD-100 on again in order for it to correctly initialize itself.
4.3 Operating Modes

The AGD-100 works in the following operating modes:

- Measurement mode
  for displaying measurement values or status messages
  (→ 24)

- Parameter mode
  for entering or displaying parameters (→ 25)
4.4 Measurement Mode

The Measurement mode is the standard operating mode of the AGD-100. Measurement values and status messages (→ 30) are displayed in this mode.

![Diagram of Measurement mode](image-url)
4.5 **Parameter Mode**

The Parameter mode is used for displaying, editing and entering parameter values.
Selecting a parameter

⇒ The name of the parameter
e.g.: Sensor
is displayed as long as the key is pressed or at least for 1 s.
Afterwards, the currently valid parameter value is displayed.

Editing the parameter value

⇒ Press key <1 s:
The value is increased / decreased by 1 increment.

⇒ Press key >1 s:
The value is increased / decreased continuously.

⇒ Save the modified parameter value.
4.5.1 Gauge Identification

Type of the selected gauge is displayed.

- Pirani gauge (PVG-500, PVG-502) (default)
- Pirani/Capacitive gauge (PCG-750, PCG-752)
- Cold cathode/Pirani gauge (FRG-700, FRG-702)

4.5.2 Pressure unit

Unit of measured values, thresholds etc.

- mbar (default)
- Torr
- Pascal
4.5.3 **Switching threshold**

The AGD-100 has a switching function with one adjustable threshold. The status of the switching function is displayed on the front panel (→ § 21) and can be evaluated via the floating contact at the CONTROL connector (→ § 19).

<table>
<thead>
<tr>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>The switching threshold defines the pressure at which the switching function is activated when the pressure is dropping.</td>
</tr>
<tr>
<td>e.g.:</td>
</tr>
<tr>
<td>(default)</td>
</tr>
</tbody>
</table>
5 Maintenance, Repair

The product requires no maintenance.

Cleaning the AGD-100
For cleaning the outside of the AGD-100, a slightly moist cloth will usually do. Do not use any aggressive or scouring cleaning agents.

DANGER
DANGER: mains voltage
Contact with live parts is extremely hazardous when any liquids penetrate into the unit.
Make sure no liquids penetrate into the equipment.
6 Troubleshooting

Signalization of errors

- **FAIL**

<td>⇒ Adjust the gauge ([1],[3],[4]).</td>
</tr>
</tbody>
</table>
Technical support

If the problem persists after the message has been acknowledged for several times and/or the gauge has been exchanged, please contact your local Agilent service center.
7 Repair

Please contact your local Agilent service center.

Agilent assumes no liability and the warranty becomes null and void if repair work is carried out by the end-user or third parties.

8 Storage

Caution

Caution: electronic component
Inappropriate storage (static electricity, humidity etc.) can damage electronic components.
Store the product in a bag or container. Observe the corresponding specifications in the technical data (→ 12).
9 Disposal

**DANGER**

DANGER: contaminated parts
Contaminated parts can be detrimental to health and environment.
Before beginning to work, find out whether any parts are contaminated. Adhere to the relevant regulations and take the necessary precautions when handling contaminated parts.

**WARNING**

WARNING: substances detrimental to the environment
Products or parts thereof (mechanical and electric components, operating fluids etc.) can be detrimental to the environment.
Dispose of such substances in accordance with the relevant local regulations.

**Separating the components**

After disassembling the product, separate its components according to the following criteria:

- **Contaminated components**
  Contaminated components (radioactive, toxic, caustic or biological hazard etc.) must be decontaminated in accordance with the relevant national regulations, separated according to their materials, and disposed of.

- **Other components**
  Such components must be separated according to their materials and recycled.

Instructions for returning products

Dear Customer:

Please follow these instructions whenever one of our products needs to be returned.

1) Complete the attached Request for Return form and send it to Agilent Technologies (see below), taking particular care to identify all products that have pumped or been exposed to any toxic or hazardous materials.

2) After evaluating the information, Agilent Technologies will provide you with a Return Authorization (RA) number via email or fax, as requested.
   Note: Depending on the type of return, a Purchase Order may be required at the time the Request for Return is submitted. We will quote any necessary services (evaluation, repair, special cleaning, eg).

3) Important steps for the shipment of returning product:
   • Remove all accessories from the core product (e.g. inlet screens, vent valves).
   • Prior to shipment, drain any oils or other liquids, purge or flush all gasses, and wipe off any excess residue.
   • If ordering an Advance Exchange product, please use the packaging from the Advance Exchange to return the defective product.
   • Seal the product in a plastic bag, and package product carefully to avoid damage in transit. You are responsible for loss or damage in transit.
   • Agilent Technologies is not responsible for returning customer provided packaging or containers.
   • Clearly label package with RA number. Using the shipping label provided will ensure the proper address and RA number are on the package. Packages shipped to Agilent without a RA clearly written on the outside cannot be accepted and will be returned.

4) Return only products for which the RA was issued.

5) Product being returned under a RA must be received within 15 business days.

6) Ship to the location specified on the printable label, which will be sent, along with the RA number, as soon as we have received all of the required information. Customer is responsible for freight charges on returning product.

7) Return shipments must comply with all applicable Shipping Regulations (IATA, DOT, etc.) and carrier requirements.

RETURN THE COMPLETED REQUEST FOR RETURN FORM TO YOUR NEAREST LOCATION:

4) HEALTH AND SAFETY CERTIFICATION

AGILENT TECHNOLOGIES CANNOT ACCEPT ANY PRODUCTS CONTAMINATED WITH BIOLOGICAL OR EXPLOSIVE HAZARDS, RADIOACTIVE MATERIAL, OR MERCURY AT ITS FACILITY.
Call Agilent Technologies to discuss alternatives if this requirement presents a problem.

The equipment listed above (check one):

- [ ] HAS NOT pumped or been exposed to any toxic or hazardous materials. OR
- [ ] HAS pumped or been exposed to the following toxic or hazardous materials. If this box is checked, the following information must also be filled out. Check boxes for all materials to which product(s) pumped or was exposed:

- [ ] Toxic [ ] Corrosive [ ] Reactive [ ] Flammable [ ] Explosive [ ] Biological [ ] Radioactive

List all toxic/hazardous materials. Include product name, chemical name, and chemical symbol or formula:

NOTE: If a product is received at Agilent which is contaminated with a toxic or hazardous material that was not disclosed, the customer will be held responsible for all costs incurred to ensure the safe handling of the product, and is liable for any harm or injury to Agilent employees as well as to any third party occurring as a result of exposure to toxic or hazardous materials present in the product.

### Additional Terms

Section 6) ADDITIONAL TERMS

Please read the terms and conditions below as they apply to all returns and are in addition to the Agilent Technologies Vacuum Product Division – Products and Services Terms of Sale.

- Customer is responsible for the freight charges for the returning product. Return shipments must comply with all applicable Shipping Regulations (IATA, DOT, etc.) and carrier requirements.
- Customers receiving an Advance Exchange product agree to return the defective, rebuildable parts to Agilent Technologies within 15 business days. Failure to do so, or returning a non-rebuildable part (crashed), will result in an invoice for the non-returned/non-rebuildable part.
- Returns for credit toward the purchase of new or refurbished Products are subject to prior Agilent approval and may incur a restocking fee. Please reference the original purchase order number.
- Units returned for evaluation will be evaluated, and a quote for repair will be issued. If you choose to have the unit repaired, the cost of the evaluation will be deducted from the final repair price. A Purchase Order for the final repair price should be issued within 3 weeks of quotation date. Units without a Purchase Order for repair will be returned to the customer, and the evaluation fee will be invoiced.
- A Special Cleaning Fee will apply to all exposed products per Section 4 of this document.
- If requesting a calibration service, units must be functionally capable of being calibrated.
