Description
The SureTag Complete DNA Labeling Kit (Agilent part number 5190-4240) includes all the components necessary to differentially label genomic DNA samples with fluorescently-labeled nucleotides and purify the labeled DNA.

Test Conditions
The SureTag Complete DNA Labeling Kit is tested in a complete microarray experiment using Agilent’s Oligonucleotide Array-Based Comparative Genomic Hybridization (aCGH) microarrays. The results of the microarray experiment are analyzed to verify that the labeled genomic DNA displays proper signal intensity, signal-to-noise ratio and DLR spread values. The labeled DNA is also tested by spectrophotometry to verify yield.
